	<ul style="list-style-type: none"><li>• Social Login (Facebook, Twitter, Google, LinkedIn, Apple) Implementation</li><li>• Socket Integration , Chatting Functionality, Video Audio Call Integration with <b>WebRTC , VoIP</b> , Bluetooth and HomeKit FrameWork</li><li>• Google Map Integration , GeoFencing , Live tracking , NSLocalization</li><li>• Payment Gateway Integration (Stripe , RazorPay)</li><li>• Firebase Dynamic Link , Firebase Analytics , InAppMessaging , Firebase Performance Review , Firebase ML , Firebase Crashlytics</li><li>• Generating &amp; Scanning the QR Code and Printing through the application .</li><li>• Push Notification APNS , Firebase PushNotification</li><li>• Upload application to the app store and play store</li></ul>
--	---

## PROFESSIONAL EXPERIENCE

### Previous Organization : Goalsr India Private Limited

**Duration** : September 2015 to September 2016

**Designation** : Junior Mobile Application Developer (iOS and Android)

**Duration** : September 2016 to September 2017

**Designation** : Software engineer (iOS Application Developer)

### Current Organization : Zumpu Software Solutions (EZjobs)

**Duration** : September 2017 to till Now

**Designation** : Senior Software engineer (Senior iOS Application Developer)

## PROJECT DETAILS

### EZJobs Placement Assistance:

The EZJobs Placement Assistant (EZPA) is a premier placement suite that helps placement officers in colleges, universities, and other educational institutions. EZPA helps recruiters and staffing firms place their consultants-on-bench.

### EZJobs :

Part and Full-time vacancies: Whether it is part-time, full-time, contract jobs, student jobs or even a nanny, hire people ready to start work immediately. Find local candidates that match the job: With EZJobs, you can hire for internships and student jobs right from your town and neighborhood.

### EZSell: Sell Buy Lend Borrow :

Buy local stuff and land local deals for used or new items. If it's your lucky day, you can find some items you need for free. Sell your unused stuff to local buyers. Clean up unused items from your garages and closets. Attract more

buyers by listing some items for free. Buy online and save money or borrow online and save even more! On the flip side, you can sell or lend and make money at once or by the clock.

### **Onata: Campus Services :**

Look through available services - give us the details and we'll populate locals available to help.

Get matched - select from a list of qualified and fully vetted providers for each service.

Get it done - select when, where & BOOM, your Provider arrives to provide your service...

Track It - Track service fulfillment from the time of booking to the completion of the service.

Review - Rate & review your provider as they'll do the same for the highest community standards.

### **Onata: For Service Providers :**

Set up a service - pick a service you want to provide and we'll populate locals that are looking for you.

Get matched - once someone finds you, you'll get a request with service details.

Get it done - accept the request & BOOM, you're on your way to provide your first service.

Review - Rate & review your service seeker as they'll do the same for the highest community standards.

### **Chachi's Homemade Food USA**

Find homemade food near you or offer your own special dishes. Exchange contacts with foodies and chefs in your neighborhood and discover a unique social experience. Let your friends know what you are cooking or craving, and enjoy homemade food together.

### **YelliGo**

YelliGo is an app based and web based automation system used by Goalsr Inc. as an employee activity and task management system used for management of assignments by higher management. The app also gives a broad perspective of planning, managing tasks for employees with client management facilities.

### **ABInBev**

Compliance Channel is an app based and web based application through which employees of ABInBev can submit requests and the administrator can view the request and provide approval for certain activities which the employees have submitted. Compliance Officers create the zone based forms. Employees log requests for approval. Confidential Helpline log for Customers or Suppliers. Compliance Officers process the requests. Charts for Reporting requests according to Status. FAQ for guidelines.

## **ROLES AND RESPONSIBILITIES :**

- ✓ Requirement Gathering & Providing the best suitable solution . Implementing business logic for the assigned modules .
- ✓ Creating Storyboards and Xib , develop mobile applications user interface
- ✓ Integrating web services for mobile applications for IOS .
- ✓ Unit testing , debug and resolve the issues
- ✓ Work with Team Members and with team spirit . Leading and Managing the IOS Team .
- ✓ Application code review.
- ✓ Application Code Merging Using Git.
- ✓ Application build and deployments with Jenkins .
- ✓ Managing Store listing and Uploading Application in App Store.
