05-12-1996

## PROJECTS

- **Title:** A systematic literature review of blockchain applications in banking and financial institutions.
- **Description:**The research provides a systematic literature overview of blockchain technologies across banking and financial institutions around the world and in India. This aims to understand the literary view of the history of blockchain and a brief overview of applications in finance-oriented sectors and the status of its implementation in foreign countries and India and its main financial advantages. It also points out possible opportunities and challenges to both public and private sector organisations with blockchain technology in India and their way of taking potential action.
