

Shaila Hemant Thorat

Current Role: Blue Prism Certified Developer / Consultant

Contact: +1 971 331 2932

Email Id: <mandave.shaila@gmail.com>

Experience Summary

- Total IT Experience 9+ Years.
- 3+ years of experience in Robotic Process Automation (RPA) using Blue Prism and little bit with UiPath
- 5+ years of experience in Excel automation
- Proficient in RPA processes, including requirements gathering, solution designing, coding, testing, debugging, documentation and implementation using different tools such as Blue Prism and UiPath.
- Experience in Robotic Process Automation Tool Blue Prism to automate web applications, desktop application, and SAP applications.
- Involved in process automation collaborations with business users globally to analyze business processes, recommend RPA based solutions for the processes, and develop robots using Blue Prism software.
- Experience in implementing Blue Prism User authentication by defining user roles, creating users and setting password policies.
- Strong knowledge on the process error handling, process editing and debugging of an automation process.
- Experience in solely automating complex processes using blue prism from scratch to deployment
- Performed multiple PoC's with Blue Prism to prove capabilities of Blue Prism to multiple clients

Technical Skills

Technical Skills	RPA – Blue Prism Certified , UiPath (Level 1 ,Level 2 Certified)
Database	MS SQL Server
Software Development Methodology	Agile-SCRUM
Tools	Blue Prism, UiPath

Education Summary

Qualification Category	Subject	Percentage
B.E.	Bachelors of Electronics Engineering	77.00

Certificate:

- Blue Prism Certified Developer
- UiPath (Level 1 , Level 2) Certified

TCS Project Experience Summary

Project	RPA – Boeing
Customer	Boeing, USA
Period	May 2020 – Sep 2020
Role	Senior RPA Developer
Description	Worked as a developer as a part of team. Project was dedicated to automating access allotting system at Boeing.
Responsibilities	<ul style="list-style-type: none">○ Reviewing existing codes○ Analyzing existing processes○ Gathering requirements, analyzing them○ Designing the solution○ Preparing Solution design document○ Automating processes using Blue Prism○ Testing the functionality○ Deploying the developed processes

Project	RPA – Engie
Customer	Engie GBS, France
Period	June 2019 – Mar 2020
Role	Senior RPA Developer / Support Lead
Description	Worked on multiple projects as a part of team at Engie mainly- updating data in to SAP Applications using blue prism
Responsibilities	<ul style="list-style-type: none">○ Reviewing existing codes○ Analyzing existing processes○ Gathering requirements, analyzing them○ Designing the solution○ Preparing Solution design document○ Automating processes using Blue Prism○ Testing the functionality○ Deploying the developed processes○ Developing PoC's

Project	RPA – Blue Prism Automation
Customer	Bpost (Belgium Post), Belgium
Period	Sep 2018 – May 2019
Role	RPA Lead
Description	<p>Cash Difference Handling: This project aims at automating a Process of handling Cash differences occurred in Post offices with Blue Prism</p> <p>Contract Volume Adaption: This project aims at automating a process where Business needed to change the volume of contracts to be renewed with Blue Prism.</p> <p>Invoicing Update: This small activity was built with Blue Prism which syncs the invoices with the data in SharePoint uploaded by Post Office Representatives.</p>
Responsibilities	<ul style="list-style-type: none"> ○ Managing the project ○ Gathering requirements, analyzing them ○ Analyzing existing processes ○ Designing the solution ○ Preparing Solution design document ○ Automating processes using Blue Prism ○ Testing the functionality

Project	RPA and Excel Automation
Customer	AVIVA ASIA, Singapore
Period	Dec 2017 to Aug 2018
Role	RPA Developer
Description	The project aims at automating all kinds of Processes of clients based on Blue Prism tool for RPA. There were multiple processes which included manual efforts of Insurance agents, were automated using Blue Prism. Mainly worked on MS Excel reports which were automated using either macro or Blue Prism.
Responsibilities	<ul style="list-style-type: none"> ○ Analyzing existing processes ○ Analyzing requirements ○ Automating processes using Blue Prism ○ Testing the functionality

Project	Excel Automation
Customer	Standard Chartered Bank, Singapore
Period	Sep 2017 to Dec 2017
Role	VBA Developer
Description	<p>The project aims at optimising the existing Fund upload template and reducing the turnaround time of the overall process.</p> <p>The existing Fund upload process is a 2 step process where the user spends extra time completing Fund Part 1 because there are too many non-credit related fields. This project aims at rectifying the difficulties relating to the fund upload template and ensure that most of the field validation and business rule validations are managed at the uploader template itself. This will help streamlining the process and reduce the processing time taken at the Client system.</p>
Responsibilities	<ul style="list-style-type: none"> ○ Optimizing existing tool with its coding functionality ○ Modifying the code for new field and business rule validations ○ Developing, Testing the Fund uploader tool

Project	Excel Automation
Customer	TCS Internal (Consulting and service Integration Unit), India
Period	Jan 2013 to Aug 2017
Role	VBA Developer
Description	Designing, developing, testing and maintaining excel applications and access databases as per projects requirements
Responsibilities	<p>Developed complex excel based apps. Used arrays, events, pivots, excel tables, list-objects, Named ranges, excel formulas and functions like Indirect, lookups, etc. Defined functions for repetitive code in macro. Handled errors.</p> <ul style="list-style-type: none"> ▪ Have automated many reports with the help of macro and pivots ▪ Have prepared Project reporting tool using MS Access. Using row data from excel workbook as input, the tool was generating report based on the queries at the back end ▪ Have simplified many processes to just one click. Prepared dashboards, charts automatically with macro. ▪ Created VBA programs to automatically update Excel workbooks ▪ Developed GUI interfaces using MS Excel buttons and named Ranges

Project	VHDL Testing
----------------	--------------

Customer	Goodrich Aerospace Services Ltd (UTC aerospace systems), India
Period	May 2011 to Dec 2012
Role	Testing and verification Engineer
Description	Worked at client side as Verification Engineer. Goodrich Aerospace is currently known as United Technology Services.
Responsibilities	Analysing complex requirement documents <ul style="list-style-type: none"> • Developing test plan • Helping customer for planning schedule • Developing test inputs in VIM editor, reviewing them • Carrying out simulations using MODELSIM, verifying outputs • Debugging the tests, and logging the issues
