# NAGASUBBA REDDY PIDUGU

Creative Full stack developer with 12+ years of experience, providing high impact web development solutions for diverse industry platforms. Aspiring to combine technical skills, quick learning attitude, innovative mindset and management abilities for self and organization growth.

+91-9538973720

nagasubbar.pidugu@gmail.com

Core Competencies

Angular	HTML5. CSS and Bootstrap
Java/J2ee	Spring Boot/ Spring MVC
Hibernate	MySql and Oracle
Rest APIs	Mendix
React JS	Vue JS

Soft Skills

- Collaborator
- Team Builder
- Communicator
- Problem-solver

Profile Summary

- **12+ Years** of experience as a **Full stack developer.**

- Having good experience in **UI/UX** design & development.

- Involved in development of applications using Java and J2EE

- Coordinate with Business for UAT and Production related issues and provide on time quality support.

- Implementing Backend Services/APIs for various CURD operations, Authentication and Authorization using **Java, Hibernate, Spring Boot, JPA Repository and Spring MVC**.

- Good Experience in UI development using **HTML5, CSS, Bootstrap, Vue JS, JavaScript and Angular Services and Routing and React Js.**

- Resolve complex functional and technical issues by analysing business processes, providing reliable prototypes to the Product. Process Lead for design and development, including assessing impacts on operations, optimizations, connectivity between the modules, sizing and Memory Leakage.

- Good Knowledge of **GIT, GIT Lab**, **Bitbucket, Jenkins, PCF, Azure Cloud.**

- Good communication skills, interpersonal skills, self-motivated, quick learner, team player. Leading all kinds of Operations and responsibilities in the Product Development with the team.

- Ability to work under pressure and deliver good quality product within given time line.

Career Timeline

May'11-Dec'14
Capgemini India Pvt Ltd as a Consultant

Feb'16-Jul'17
Infinite Computer Solutions India Pvt Ltd as a Technical Lead

Jul'20 – Jan'22
Wells Fargo as a Apps Systems Engineer 5

Dec'14-Feb'16
Tech Mahindra as a Associate Business Consultant

Jul'17-Jun'20
Altisource Business Solutions Pvt Ltd as a Lead Engineer

Jan'22 – Jul'23
Intelizest Consulting Pvt Ltd

Developing end-to-end Application Analysing, Designing, Implementing, Unit Testing, Reviewing, Following Coding Standards, Fixing SIT/UAT/Production Issue, Communicating with Clients for Application Demo and Feedback.

Highlights:

Fullstack Developer	Experience in Handling Team.	Experience in Server configuration and Deployment of service for websites.	Rewarded with multiple acknowledgements for Team Work & Innovative Solutions	Taking Responsibilities to explore my capabilities and gaining Experiences.

Certifications
- SCJP (Sun Certified Java Programmer, V5.0) certified.
- SCWCD (Sun Certified Web Component Developer, V5.0) certified.

Trainings Attended
- Full Stack Development Seminars.
- Pivotal Cloud Foundry

Academic Details
- MCA, Sri Krishnadevaraya University, Anantapur – 2008 (%age 70).
- B.Sc., Sri Venkateshwara University, Tirupati–2004. (%age 61)
- 12th – R.E.S.S.V Jr College, Khajipet -2001 (% age 62)
- 10th – Z.P.B.H.S School, Khajipet -1999 (% age 54)

IT Skills

Technologies	HTML5, CSS, Bootstrap, Mendix, Angular12, Angular JS, React Js, REST APIs, MySQL, JSON
Databases	MySQL, Oracle
IDE	STS, VS code, Eclipse
Servers	Tomcat, Node JS
Tools	Citrix, SVN, GIT, GIT Lab, Maven, Log4j, Bugzilla, JIRA, Bitbucket, Jenkins
Frameworks	Angular, Spring boot, Hibernate, Cypress, Junit

Personal Details

Date of Birth: March 05, 1984   **Languages Known:** English, Telugu & Hindi   **Location:** Bengaluru

Project Summary

1. **LMS Servicing**

   Organization: Intelizest

   Duration: Jan 2022 – July 2023

   Environment: Windows 10, ANGULAR 12, Type Script 3, JavaScript, CSS3, HTML5, Rest APIs, JIRA, GIT, Jenkins, Bitbucket, Java, Spring Boot, Hibernate, My SQL.

   Description:

   The **Loan Management System (LMS)** is an application portal and is used by different customers in USA to apply for different kinds of loans and using this application contains different modules i.e., Payments, Collections, Stores, operations and admin to process and maintain the loans.

   Responsibilities:

   - Involved in APIs development using spring boot, Hibernate and Rest API.

   - Involved in writing components using Angular12 & Material.

   - Creating Cross-browser compatible and standards-compliant CSS-based page layouts.

   - Creates the technical direction with the team for SPA's, Designs the flow of a SPA.

   - Involved in writing code coverage test cases using Cypress & Junit frameworks.

   - Involved in UI/UX designing and development.

   - Involved in designing model components.

   - Involved in CI/CD Pipeline and deployment.

   - Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Unit Testing.

2. **Liquidity Analytics and Reporting System (LARS)**

Organization: Wells Fargo
Duration: July 2020 – Jan 2022

Environment: Windows 10, ANGULAR 8, Type Script 3, JavaScript, CSS3, HTML5, rest API, JIRA, GIT, Jenkins, PCF, Azure.

Description:

The **Liquidity Analytics & Reporting (LAR) Group** is part of Wells Fargo Corporate (WFC) Finance Treasury, The Group is responsible for analysis and related reporting to WFC Senior Management and Regulators on Liquidity Risk across the enterprise.
Liquidity is a firm's ability to meet its financial obligations in a timely manner without incurring extraordinary costs or losses.
Liquidity Risk is impacted by all activities/events that may cause cash to flow in or out of WFC and it's various (Legal) Entities.
Key aspects of Liquidity Analysis include understanding:
   A. **The nature and timing of Cash Flows:** from all of WFC's Assets and Liabilities (Including Off-Balance Sheet Items) and comprehensive **Stress Testing** of those Cash Flows.
   B. **Market Conditions:** Behaviour Including concentrations of Funding among Customers, Industries or Products.
   C. **Legal Entity:** makeup of WFC and jurisdictional boundaries or other impediments preventing the transferability of Liquidity in stressful situations.

Responsibilities:

- Involved in writing components using Angular8 & Prime NG.

- Involved in UI/UX designing and development.

- Developed client-side validation code using prime NG toaster & angular components.

- Creating Cross-browser compatible and standards-compliant CSS-based page layouts.

- Responsible for Release management, branching strategy in Jenkins.

- Creating user interfaces and wireframes as per client provided displays and Design.

- Involved in the Project Core Development Team. Have developed the Code as a Project Lead Developer to the Team and assigned the user stories to them.

- Creates the technical direction with the team for SPA's, Designs the flow of a SPA.

- Involved in each Task work hour estimation process for self and Team Members Code Development.

- Take responsibility for code quality and handover to project teams.

- Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Unit Testing.

- Involved in APIs development using spring boot, Hibernate and Rest API

3. **Mortgage Builder (MBNG)**

Organization: Altisource
Duration: July 2017 – June 2020

Environment: Windows 8, ANGULAR 8, Type Script 3, JavaScript, CSS3, HTML5, rest API, Mendix, JIRA, confluence.

Description:

Mortgage Builder, an Altisource business unit, delivers innovative mortgage origination software solutions that adapt to our unique operations. Mortgage Builder combines best practices, a broad mortgage ecosystem and an end-to-end Loan Origination Software (LOS) platform to help us close more loans for less. Borrowers love the efficiency and Convenience of self-service through the borrower's portal, and having 24×7 access to the status of their loan. Loan Officers, broker's lenders can originate more loans faster with our easy-to-use, mobile-friendly originations portal.

Responsibilities:

- Built Rich Prototypes and Applications using Angular8, HTML5, CSS3, JavaScript, JSON, and Bootstrap.

- Involved in writing components using Angular8.

- Developed client-side validation code using JavaScript.

- Creating Cross-browser compatible and standards-compliant CSS-based page layouts.

- Responsible for Release management, branching strategy in Azure source safe.

- Creating user interfaces and wireframes as per client provided displays and Design.

- Involved in the Project Core Development Team, Involved in code reviews.

- Creates the technical direction with the team for SPA's, Designs the flow of a SPA.

- Involved in each Task work hour estimation process for self and Team Members Code Development.

- Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Unit Testing.

4. **Xerox MMIS HE Platform**

   Organization: Infinite
   Duration: Dec 2016 – July 2017

   Environment: Windows 8, ANGULAR 2, JavaScript, jQuery, AJAX, CSS3, HTML5, WebSphere, RAD, Core Java, JSP, Servlets, Struts, Hibernate., JIRA, Confluence.

   Description:
   Xerox (MMIS) Medicaid Management Information System Health Enterprise Platform, Xerox Health Enterprise manages all aspects of contemporary Medicaid programs, including provider credentialing, member enrolment and management, and benefit plan management. It offers a variety of advantages, As the CMS-certified Xerox Health Enterprise system is rolled out in other states, and they can access additional features.
   More info: https://www.conduent.com/government-healthcare-solutions/
   A unified web portal to various user categories such as Member and Provider.
   Member Portal: Web support for Enrolment, Eligibility, and Information.
   Provider Portal: Web support for Enrolment, Management.
   Operations: Claims.

   Responsibilities:

- Built components using Angular8, HTML5, CSS3, JavaScript, JSON, and Bootstrap.

- Involved in UI/UX designing and development.

- Developed client-side validation code using JavaScript.

- Creating Cross-browser compatible and standards-compliant CSS-based page layouts.

- Creating user interfaces and wireframes as per client provided displays and Design.

- Involved in the Project Core Development Team. Have developed the Code as a Project Lead Developer to the Team and assigned the user stories to them.

- Analyzing the functional specification documents, requirements HLD & Technical design docs to the team members.

- Creates the technical direction with the team for SPA's, Designs the flow of a SPA.

- As a Lead handled the team to meet the expectation for the 2-week delivery.

- Involved in each Task work hour estimation process for self and Team members Code Development.

- Take responsibility for code quality and handover to project teams.

- Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Unit Testing.

- Involved in APIs development using spring boot, Hibernate and Rest API.

5. **DSDT (Device Specifications Database Tool)**

Organization: Infinite
Duration: Feb 2016 – Nov 2016

Environment: Windows 8, Angular JS, JavaScript, jQuery, AJAX, CSS3, HTML5, WebLogic, Aptana Studio and Eclipse.

Description:
DSDT is a Device Specifications Database tool to maintain all the products & devices information such as software updates, Info about Launched, Pre-Launched and retired Devices, Info about Vendors, Admin Users info. This application contains different modules like Menu Management, DOU Results, SU & Test Results, Vendors, Admin Console.

Responsibilities:

- Mentored by pair programming and code reviews with developers to uphold coding best practices.

- Experience in coordinating with Onsite & Offshore teams.

- Built Rich Prototypes and Applications using HTML5, CSS3, JavaScript, Ajax, JSON, Angular JS, and Bootstrap.

- Developed client-side validation code using JavaScript with ES5 and JQUERY.

- Creating Cross-browser compatible and standards-compliant CSS-based page layouts.

- Creating user interfaces and wireframes as per client provided displays and Design.

- Involved in the Project Core Development Team. Have developed the Code as a Main Developer to the Team.

- Analyzing the functional specification documents, requirements HLD & LLD and preparation of Project plan and worked with the team members.

- Creates the technical direction with the team for SPA's, Designs the flow of a SPA.

- Involved in each Task work hour estimation process for self and Team Members Code Development.

- Participating in the daily scrum meetings and status updates and reports to manager.

- Work within the Product Development team, to an agile methodology.

- Involved in UI/UX designing and development.

6. **Genband Generic Container**

Organization: Tech Mahindra
Duration: Dec 2014 – Jan 2016

Environment: AngularJS, Web RTC, JavaScript, jQuery, AJAX, CSS3, HTML5, Tomcat and Eclipse.

Description:
Genband Generic Container is an application to test all the provided APIs. This application contains different modules like VDI Wizard: provides Microphone, Speaker, Camera & network related APIs. Audio/video test Wizard: which provides APIs to test audio/video devices. Settings: which provides all the settings related APIs. Audio/Video Call: provides audio/video call, recording features along with statistics reports.

Responsibilities:

- Integration of Web RTC APIs with our design and established audio & Video call.

- Involved in coding, dummy data preparation & unit testing.

- Preparing Unit Test cases documentation and Release documents to testing process.

- Implementing MVC Structure to develop Application.

- Participating daily scrum meetings, and reports to the Manager.

- Participating in the daily scrum meetings and status updates and reports to manager.

- Work within the Product Development team, to an Agile methodology.

- Take responsibility for code quality and handover to project teams.

- Designed and developed the architecture of various screens in accordance to UI Specs following client branding standards.

- Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Integration.

- Involved in unit & integration/BAT testing and fixing the bugs.

- Developed various SQL queries and SQL Procedures in SQL DB for the application.

- Written SQL queries ad involved with data tam for writing store procedure.

- Organize the development and the continuous improvement activities of build process, design process, software release process and the team estimation process.

- Understanding the business domain and technology stakeholder.

- Releasing final product to Design Transfer team.

- Creating the patches, hotfixes for the site and deployment of the same.

- Fixing the installer related defects from sites as well as R&D.

- Continuously improving developer experience by toll development and rapid deployments.

- Own prioritized incidents and acknowledge them with proper solution which can avoid recurrence.

- Responsible for logging change requests and get it done in agreed time frame.

- Meeting all Support activities within SPA.

7. **DTDC Helios**

   Organization: Capgemini
   Duration: May 2011 – Nov 2014

   Environment: Core Java, JSP, Servlets, Struts, Hibernate, spring, JavaScript, JSP, jQuery, AJAX, CSS, HTML5, MySQL, Tomcat and Eclipse.

   Description:

   The CTBS+ (Consignment Tracking and Billing System Application) is used as part of the day-to-day operations of consignment booking and tracking. CTBS+ provides an integrated Business environment that will enable DTDC to book, track, account, bill, manifest consignments. It has several modules like, Booking, Manifest, Rate calculation, Dispatch, Delivery, Tracking, Billing system, Transit time calculator, Franchisee Mgmt., Misc. Expenses, Claims and CRM.
   The components of logical application architecture are as follows:
   CTBS Branch application: This application collects and registers the information provided by end users in CTBS application.

Responsibilities:

- Involved in coding, dummy data preparation & unit testing.

- Preparing Unit Test cases documentation and Release documents to testing process.

- Implementing MVC Structure to develop Application.

- Participating daily scrum meetings, and reports to the Manager.

- Participating in the daily scrum meetings and status updates and reports to manager.

- Work within the Product Development team, to an Agile methodology.

- Provide leadership and guidance to coach, mentor and lead team members and project teams.

- Take responsibility for code quality and handover to project teams.

- Designed and developed the architecture of various screens in accordance to UI Specs following client branding standards.

- Involved in complete Agile / SDLC - Requirement Analysis, Development, System and Integration.

- Involved in unit & integration testing and fixing the bugs.

- Written SQL queries ad involved with data tam for writing store procedure.

- Organize the development and the continuous improvement activities of build process, design process, software release process and the team estimation process.

- Understanding the business domain and technology stakeholder.

- Releasing final product to Design Transfer team.

- Creating the patches, hotfixes for the site and deployment of the same.

- Fixing the installer related defects from sites as well as R&D.

- Continuously improving developer experience by toll development and rapid deployments.

- Own prioritized incidents and acknowledge them with proper solution which can avoid recurrence.

- Responsible for logging change requests and get it done in agreed time frame.

- Meeting all Support activities within SPA.
