October 2018 –  
September 2020

**Eternus Solutions** – *Pune India*

Senior System Executive

## **Philippines-based Client in the FMCG Sector**

**Role:** Senior Developer / Consultant

### **Description:**

Philippines based clients had a requirement of electronically creating and maintaining various Forms that the sales users used to fill out manually (on paper). Client wanted a Calendar based solution in which the Sales User would create tasks for himself for the Month and send it to his immediate Manager for approval. Once it is approved, the Sales user will perform the tasks and update the Forms in the respective forms related to each task. This can be done through a mobile app or through Salesforce login.

**Responsibilities:**

- Created Web services to be consumed by the Mobile Application to send data to Salesforce.
- Created a Single Page Application having a calendar view for creating Tasks against a particular Month and sending it back to Manager.
- Leveraged the Approval Process of Salesforce Platform to Approve / Reject the Tasks.
- Created various eForms that the Sales User can fill against each of the Tasks carried out.
- Created reusable aura components which will be used to show the data.
- Developed Lightning component for navigating from one component to another.
- Used Changeset Deployment to move changes from -> to: Developer Org -> Staging Org  
-> PreProd Org - > Production Org.

**Environment/Tools:** Force.com, Apex, Lightning Components, Visualforce, JavaScript Remoting, Apex Triggers, Batch Apex, VS Code, Process Builder, WorkFlows, Web-Services, BitBucket.

**January 2018 -
