PROJECT DETAILS

MINI PROJECT

Project Title: Library Database Management (Student Registration Form)
Technology Used: ASP.NET & SQL R2 2008
Technologies Used: ASP.NET (Web Application) & SQL R2 2010

- Library Database Management is used to store and explore the Library related books according to its categories.
- .Student Database Management is a Web Application Form which is used to Store, Edit, Update & Delete Student Personal Information into the Database.

PROJECT DETAILS

MAIN PROJECT

Project Title: ASYLUM PATROL
Technologies Used: XML, Java, Eclipse Luna, SQL Database R2 2010.
Platform: Android (Supports Android Version 5.0 and Later)

- ASYLUM PATROL is a Data Protective and Money Transaction supportive project which is supported for Android Smartphones.
- ASYLUM PATROL allows serious privacy concerns due to the lack of privacy preservation mechanisms through sensor-equipped smartphones.
- This can be accessed by the untrusted context-aware applications or be used to answer queries from those applications. An adversary has a greater difficulty in inferring about the real contexts.
- In this project, we apply a deception policy for privacy preservation and present a novel technique ASYLUM PATROL.

DECLARATION

I hereby declare that all the above details are true to the best of my knowledge and belief.
