Work History

2018-12 - Current

Programmer Analyst

Cognizant Technology Solutions, Noida, Uttar Pradesh

- Working for one of the leading finance companies in India having a wide range of financial products. We have launched a personal Loan financial product which is enabling the customer to log in to a mobile and get a personal loan in his bank account in 3 minutes after doing all identity and credit verifications online. There were STP (Straight through process) for direct mobile disbursement and NSTP (non-STP) for process where the customer dropped off from mobile or wanted offline team to handle the remaining process.
- **AWS-Salesforce** integration using **Cloudcube** attached to **Heroku** application for fast uploading with privacy management. Built application to upload and view documents using lighting component and apex. Currently used by more **thirty thousand users** per day on an average.
- Mastered with the skill of implementing **Einstein case classification**, queue assignment and case acceptance functionalities for different sets of roles and users using lightning components and triggers.
- Integrated salesforce with various **ESB Service API** for different business logic.
- Experience in **Heroku** as a platform with add-ons like **Cloudcube, Heroku Connect, Heroku Postgres, Papertrail, Sendgrid**.
- Built several **Node-Js** based Rest API serving as a bi-directional sync between mobile application and salesforce using Heroku as a platform.
- Salesforce lightning expert with dedicated experience in application development using **lightning aura** and **LWC**
