📊 Core Competencies

- Oracle Application Database Administration
- Experience in MS-SQL,Snowflake databases
- Installation, Configurations, Migration
- Incident and Problem Management; Root Cause Analysis; Application Maintenance, Troubleshooting
- Project Planning & Execution
- Reporting and Documentation
- Stakeholder Engagement; Cross-Functional Coordination

⚙️ IT Skills

Oracle Database 11g,12c and 19c ■■■■■

Oracle EBIZ R12.2.3 ■■■■■

Snowflake Database Administration ■■■□

CPU Patching ■■■■■

Opatch and ADOP ■■■■■

👤 Profile Summary

- Focused professional offering **nearly 12 years** of expertise in **Oracle Apps DBA**
- Hands on experience in migrating the on premise oracle database (12c and 19c) and application(R12.2.3) to oracle cloud infrastructure (OCI)
- Highly skilled in managing **24*7 Oracle Database Administration** encompassing database planning, installation & configuration, disaster recovery planning, back-up & recovery, configuration of Stand By databases
- Hands-on experience in **Oracle Database 11g,12c and 19c**
- Skilled in evaluating **user needs & requirements**, and providing technical expertise in the development of technical, structural and organizational specifications;
- Skilled in performing **Root Cause Analysis** for production errors, and investigating & resolving **technical issues**
- Hands-on experience in **MS-SQL** and **Snowflake** databases.
- Hands-on experience in FMW instances (SOA,OSB,IPM,OBIEE).

💼 Work Experience

Dec'22 – Till date	**Sr Oracle Apps DBA, Purchasing Power Limited (PPC)**
Mar'19 – Dec'22	**Oracle Apps DBA** **Logitech, Chennai**
Feb'19 – Jul'19	**Oracle Apps DBA, LTI, Chennai**
Mar'15 – Jan'19	**Oracle Apps DBA, Logitech,Chennai**
Dec'10 – Feb'15	**Oracle Apps DBA** **Wipro Technologies, Chennai,Hyderabad**

Key Result Areas:
- Building primary and standby databases in Oracle Cloud Infrastructure (12c & 19c) and configure oracle R12.2.3 application on top of it.
- Building standby databases for Prod (11g, 12c & 19c)
- Resolving the huge archive gap between Prod and Standby using RMAN
- Taking Logical backups and restoring them as per business needs.(EXPDP/IMPDP)
- Applying CPU patches in the interval of every 6 months
- Performing database restore exercise for Oracle & MSSQL databases using Commvault
- Cloning R12.2.3 application as per business needs

Academic Details

2010
Diploma in IT[Information Technology]
Nettur Technical Training
Foundation[NTTF]
Scored 70%

2007
12th (State Board)
Intermediate
Scored 76%

Personal Details

Date of Birth: 25th July 1989

Languages: Telugu ,Tamil and English

Address: Chennai

- Applying ADOP patches whenever there is a request to apply it.
- Monitoring the Long running concurrent programs and concurrent manager queues and take action if there is any issue
- Creating & administering all database users, roles based on the new application requirement.
- Designing & implementing policies and procedures for backup/ disaster recovery to ensure effective protection of data assets
- Performing code migrations and maintenance on every weekend for all production applications and databases
- Performing PDB refresh from one CDB to another
- Executing analysis of logs, executing root cause analysis for various issues coming up on daily basis and performing bug tracking tool using JIRA
- Driving end-to-end testing, debugging and roll-out of new releases; implementing code builds and automating deployment procedures
- Cloning MSSQL server databases as per the requirement
- Aware of RAC concepts
- Creating Snowflake DB, Warehouse, Roles and assign them to users based on the requirement
- Importing new AD groups in Denodo and assigning read, write and execute privileges for AD groups in Denodo
- Migration of Pentaho Jobs from non-prod to prod environments
- Performing OBIEE code migration, RPD deployment, scheduling agents in OBIEE as per business requirement
