## Profile

Currently working as Senior Software Engineer - Salesforce at HCL Technologies, Bengaluru.  
Total Experience: 6+ Years, Salesforce Experience: 4+ Years.

## Experience

### **HCL | Senior Software Engineer - Salesforce | US Bank | August 2020 – Present**

- Worked on a bank application user story using Lightning Components
- Customization of the application regarding customers of the bank on Account, Opportunity, and Custom Objects
- Enabled Aura Framework by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in the Lightning Application
- Worked on Events and Aura methods for communication between Lightning Components
- Working on communities adding Lightning Components and showcasing the services in portal for customers

### **HCL | Senior Software Engineer - Salesforce | Healthcare Domain Project | April 19 - July 20**

- Customization of a specific application used to track the products sales
- Configuration of current application using Lookup, Master-detail & Junction objects, Rollup summary, Formula fields, Page/Search/Compact Layouts, Validation rules, List/Hierarchy Custom settings, Custom Buttons, Custom labels, and Tabs
- SOQL, SOSL queries in Triggers, Controllers and Batch Classes, also optimized queries not to hit the Governor Limits
- Written Apex triggers to accomplish various functional requirements while records are Created, Updated, Deleted or Merged and moved all Apex trigger code into a separate Apex class to avoid recursions and to follow salesforce best design practices
- Developed Apex Controllers (Standard, Custom and Extension) with various methods for the actions performed by users in the Visualforce page on various Standard and Custom objects
- Written Apex test classes using the annotations @testsetup, @isTest and testMethod keywords for creating test data, test methods, test class declarations
- Involved in migrating data from external system to salesforce using Data Loader at the time of Sandbox refresh
- Minimized code in JavaScript Controllers by adding reusable functions in Helper Component

### **Wipro | Software Engineer - SFDC Admin | Nokia | June 2017 – March 2019**

- Customization of Standard Objects like Lead, Account, Contact, Cases and Opportunity
- Worked on Object, Field Creation, Relationship Management, Page Layouts, Record Types, Formula Fields, and related customizations
- Performed day to day User Management on SFDC Org such as configuring Permission Sets, Roles and Profiles
- Created Workflow rules and Approval Processes along with field updates and email alerts
- Created and maintained the Email Templates to be used in the Workflows

**Wipro | Software Engineer - Enovia | Enovia & 3D Experience | March 2016 – May 2017**

- Business Modeler, Matrix Navigator, Schema Viewer, Data Mapping and MQL
