Introduction

With over 8 years of experience in IT Industry as Software Professional, I am currently working as Senior Salesforce Development Consultant with 5+ years in designing & developing out of the box & customized solutions within the salesforce platform. I have extensive experience working with Salesforce CRM – Sales Cloud, Manufacturing Cloud platforms, application development skills & the ability to solve complex software problems along with familiarity with Experience Cloud, CRM Analytics, Data Cloud, Product, Price Book, Quotes.

Experience

- ✓ Hands on experience in Salesforce Development with emphasis on Apex Programming, Triggers, Lightning Flows, Lightning Web Components (LWC), SOQL.
- ✓ Strong Knowledge of CI/CD processes (DevOps) for Salesforce applications & experience in deploying components between environments.
- ✓ Experience with maintaining CRM systems including updates, Sandbox refreshes, bug fixes, enhancements, building reports, managing dashboards, updating flows & security.
- ✓ Experience with salesforce.com standard objects like Accounts, Opportunity, Products, Opportunity Line Items, Quotes, Orders, Contracts, Leads, Sales Agreements & Integrations.
- ✓ Experience in managing, mentoring & providing quarterly training with presentations to salesforce team & assisting them with technical issues & escalations.
- ✓ Experience in working with Competency Excellence & Senior Leadership team in POC work for RFPs.
- ✓ Experience in Agile/Scrum processes, provides regular updates on tickets & works to resolve blockers & manage dependencies.
- ✓ Experience in engaging with business stakeholders in requirement discovery phase, performs the role of Business Analyst to prepare functional requirements (BRD), their acceptance criteria along with technical design document (TDD).
- ✓ Experience working on Onshore, UK for a year as Senior Developer with client, & brainstorming & designing & oversee offshore team.
- ✓ Experienced as Developer in non-salesforce ecosystem such as Azure Cloud, Microsoft C# .Net, Microservice architecture, Kafka platform, Team City, Octopus.
