EXPERIENCE

Cognizant — Programmer Analyst

APRIL 2019 - NOV 2021

Productivity Enhancement Tool

- Worked closely with clients regarding their needs, provided appropriate solutions, specifications, and estimations
- Worked on required features that typically involved **.NET, C#, Winform, SQL Server**, Team Foundation Server, and **Infragistics**
- Integrated **Salesforce** with application for seamless transition of data from Outlook to application using **Windows Communication Foundation, REST API**, and **Postman**
- Used TDD approach, implemented using **NUnit**
- Implemented .Net Services and wrote Stored Procedures and Functions for data-intensive operations

Location Clearing Tool

- Worked closely with Project Manager, On-Site Team and clients for understanding requirement, provided working approach and technical specification
- Worked on required features that typically involved **React JS, Node JS, Express, EJS, SQL Server, JavaScript, Redux, Bootstrap, CSS**, and **HTML**
- Optimized location clearing, and geocoding process, which resulted in the process being 5 min faster and more stable application
- Implemented field and value validation for the uploaded location CSV file, which provides exact row no. and column name of bad values, which made the clearing process more optimized as the user need not go through whole CSV for finding bad values
- Implemented application wide error log functionality
- Investigated and addressed production system issues to enhance usability and improve functionality.

Anandpushp Technologies Pvt Ltd — React JS Developer

JAN 2022 - PRESENT

- Worked closely with Business Analysts and stakeholders regarding the design of the UI
- Analyzed module and its expected workflow, provided impact analysis and estimation for module
- Implemented approved design in frontend using **React JS, HTML, Material UI**, and **CSS**
- Completed API Integration of frontend end using **Redux**
- Incorporated required functionality using **JavaScript**
- Working as a team Lead for a small team
