- ➤ Worked on Business Process Automation.
- ➤ Worked on the IT Process Automation
- ➤ Worked on different Environments like Microsoft Excel, CSV files.
- ➤ Extensively used automated test tools like QTP for Functional and Regression Testing.
- ➤ Expertise in VB Script.
- ➤ Good Exposure in using of QTP Integrated Environment (Step Generator, Synchronization, Data Table, Actions, Recovery Scenarios and Methods etc).

Tools and Technologies

Programming	VB Scripting, Macros
RPA Tool	Automation Anywhere 10.X & 11.X, Ui Path 2019.
Database	MS Access, Oracle.
Operating System	Windows 7-10,Win 2016 Server

Educational Qualifications:

COURSE	COLLEGE/UNIVERSITY	YEAR OF PASSING
B-Tech	Hyderabad inst. of tech. and management.	2017
P.U.C	Narayana Jr. college	2013
S.S.C	Geeta High School	2011

Professional Experience:

➢ Working as Software Engineer at Moonstone Info Tech Pvt. Ltd since Dec 2017.

Projects Worked on:

Project #1:
Project   **: Trade Management**
Environment   : Automation Anywhere.
Domain   : Finance
Technologies   : **Automation Anywhere 11.x.**
Duration   : Jan 2018 – June 2018

Description:
   Agenda of the process is Need to send acknowledgement to their stakeholder and Vendors. Account using Trade systems like OBOE, this system gives total trades list raised by Stakeholders for the day. Robot picks the each trade based on Settlement ID and search for the same Search tools for today. Usually it gives clover data in Grid which need to send automatically from Clover functionality. The moment it search for the Settlement ID, the clover data may found if so Robot add comments to the Settlement ID and Send mail automatically Whereas no data found case Robot need to create Spread sheet with required details and send the spread sheet to Respective stakeholder/Vendors.
Responsibilities:
   • Analyzing and Understanding the business requirements.
   • Involved in Requirements, **Analysis** and **system Design documents** preparation.
   • **Implementing** Enhancement Requests as per business requirement and **Supporting.**
   • Exception handling and Problem solving.
   • Analyzing the problems and implement the processes to improve.
   • Innovative ideas to reduce the time span of a process.

Project #2:
Project   :   **CLEAR VISION**
Environment   :   Automation Anywhere.
Domain   :   Oil & Gas Industry
Technologies   :   **Automation Anywhere 10.x.**
Duration   :   July 2018 – Jan 2019

Description:

The process of Clear Vision involves addition and closure of account details what all are coming from upstream. Here data present in excel, and open the CLEAR VISION application which is based on **Desktop** environment, and paste the data on to Clear Vision and do the check accordingly, finally update the status in excel.

Responsibilities:

- Initial Client Requirement gathering based on Project.
- Analyze user requirements, functional and technical specifications.
- Business Logic implementation / coding as per the design specifications.
- Designed, Implemented and maintained a Project, as the back bone of entire Process.
- Worked closely with Senior Developer and Technical lead in understanding the Functional and Technical design requirements for Project.

Project #3:

Project	: **Movers.com**
Role	: Software Developer
Client	: NGA Group Inc
Technologies	: **UiPath 2019**
Duration	: Jan 2019 – Till Date

Description:

Movers.com is a USA based major moving leads generation portal with its network spanning across 5 other countries and thousands of Micro-sites only in USA.

A web application for a centralized lead generation & distribution system to moving companies based on the customized user needs, to be used by all the USA moving lead generation sites associated with Movers.com.

A webmaster section to maintain the database of moving companies along with their detailed profiles required for automatic lead distribution & billing through charging them (via credit card), and generate different reports including tariff details, leads generated, leads distributed, and invoices etc.

Move Planner for users of the Movers.com site, where in they can login - view their move details & plan and organize their move. The most interesting part of the Move Planner is the Moving Wizard where in a list of predefined moving related tasks are generated based on a move date and users can add new tasks of their own, edit the existing ones, set reminders for the tasks for which they receive reminder emails.

Responsibilities:

- Involved in the complete Software Development Life Cycle including Development, Testing and Maintenance of the application.

- Acting a Mentor for the Team in Technical and Functional perspectives.
- Involved in Data base design for certain Modules.
- Developed SQL Queries & Stored Procedures to fetch complex data from different tables in SQL Server database. Utilized ADO.NET technology extensively for data retrieving, querying, storage, manipulation.
- Extensively used JavaScript and J Query for validations and to enhance the user interaction with the web pages.
- Involved in Project architecture design, requirements validations.
- Developed and consumed web development for lead generation & distribution system.
