OBJECTIVE

Results-driven Senior Java Developer with over 7 years of expertise in designing, developing, and deploying Java-based applications. Proficient in Spring Boot, microservices architecture, and cloud technologies. Proven ability to deliver high-quality solutions and effectively lead cross-functional teams

SKILLS

Programming Languages: Java 8, Java	● ● ● ● ●
Frameworks: Spring Boot, Spring Framework	● ● ● ● ●
Web Services: RESTful APIs, Microservices	● ● ● ● ●
Build Tools: Maven, Gradle	● ● ● ● ●
Testing: JUnit, Mockito, TestNG	● ● ● ● ●
Databases: Oracle, MySQL, MongoDB	● ● ● ● ●
Cloud Platforms: Amazon Web Services (AWS)	● ● ● ● ●
Version Control: Git, SVN	● ● ● ● ●
CI/CD: Jenkins, Travis CI	● ● ● ● ●
Containers: Docker, Kubernetes	● ● ● ● ●
Message Brokers: Apache Kafka, RabbitMQ	● ● ● ● ●
Frontend: HTML, CSS, JavaScript	● ● ● ● ●
Data Structure	● ● ● ● ●

EDUCATION

Master of Computer Applications (MCA) | Odisha University of Technology and Research (August 2013 > June 2016)

Bachelor of Science in Computer Science (BSc) | Utkal University (August 2010 > June 2013)

WORK EXPERIENCE

Senior Java Developer | Capgemini | Bangalore, India (2020 > Now)

- Pioneered the design and implementation of microservices architecture using Spring Boot.
- Developed and maintained robust RESTful APIs to optimize system functionality and performance.
- Collaborated seamlessly across departments to ensure the timely delivery of impactful solutions.
- Implemented CI/CD pipelines through Jenkins for streamlined automated build and deployment processes.
- Provided mentorship to junior developers, conducting thorough code reviews to ensure code quality.

Senior Software Developer | Eclerx | Mumbai, India (2018 > 2020)

- Orchestrated the development of RESTful APIs for a complex financial application using Spring Boot.
- Elevated application performance by 30% through strategic optimization of database queries.
- Implemented secure authentication and authorization mechanisms for seamless API access control.
- Collaborated closely with frontend developers to construct user-centric and responsive interfaces.
- Managed and leveraged AWS services for efficient application deployment and management.

Java Developer | Accenture | Mumbai, India (2016 > 2018)

- Developed and maintained backend services, employing Java and the Spring Framework.
- Collaborated closely with testing teams to ensure comprehensive unit and integration testing.
- Applied effective caching strategies to heighten application response times.
- Produced and maintained technical documentation for both internal and external stakeholders.

HONORS & AWARDS

Received the prestigious Applause Award on three occasions for exceptional dedication and contributions.

(2023)

Received the prestigious Applause Award on three occasions for exceptional dedication and contributions.

(2021)

Recognized for implementing a critical performance enhancement

(2020)

- Actively participated in daily stand-ups and made valuable contributions to sprint planning sessions.
