brianfjohnson100@gmail.com

Senior Financial/Business Analyst

<http://www.linkedin.com/in/brianfjohnson>

I have 20 years of experience in business analysis, systems implementation, developing process improvement programs, & delivering training to organizations. I am proficient as a liaison among cross-functional teams in order to meet agreed parameters (scope, time & cost). I specialize in process transformation utilizing Excel's VBA, SQL, Tableau, Analytics, & [Salesforce.com](https://www.salesforce.com) (Passed SFDC Certified Developer & Administrator Tests).

**PG&E Senior Financial/Business Analyst
(Contractor)**

Second Tenure, February 2020 – Present

First tenure, January 2016 – December 2016

- I act as a liaison between the IT development group & business units for development, enhancement, & implementation of new &/or existing systems by managing an \$18 million budget consisting of 17 projects
 - Redesigned the process behind the department's FP&A reporting, by creating a weekly check-in cadence, for the program managers, that presented financial forecasts & dashboards, & indexes, which resulted in a 23% decrease in monthly & a 13% decrease in quarterly variances
 - By automating the data acquisition process, I provided data solutions that informed Senior Management on performance metrics for multiple business functions using SAP, VBA in Excel & Ariba, this restructuring, enabled information to be updated instantaneously, eliminating what was a four hour preparation process that required 3 person role involvement to 1
 - Migrated the creation of KPI Metrics, that required 20 labor hours to create & disseminate in Excel to a process that requires 2 hours to create in Tableau
 - Created process flows, "How To" documentation & video training sessions on department procedures This eliminated approximately 40 hours of one-on-one knowledge transfer & provide an ongoing comprehension informational transfer method that continue to be augmented
 - Designed & implemented a Salesforce training curriculum on Reports & Dashboards administered to > 200, this training lead to a decrease of 27% in support tickets to PG&E's Salesforce support desk
 - Created Financial Models that defined: NPV, IRR, ROI, Profit, Debt-to-equity, working capital & break-even points for loans based on Quasi-Monte Carlo simulation models as a sensitivity models that determined the weight of inputs, this model was used to approve > \$100 million in loans

Net App Senior Financial/Business Analyst (Contractor)

October 2017 – January 2020

- As a Business/Financial Analyst, I was responsible for the planning, & implementation of the CIO's Strategy
 - Devised & Performed as the Project Manager for the implementation of a Mobile Application that reported Financial & Operational Statistical Data Analysis to C-Suite Management; this tool supplanted a verbose manual updating & distribution process and enable an FTE to be reallocated
 - Centralized the reporting process by using Hyperion's Essbase, I built data queries that tracked both capital and expense expenditures per department, this resulted in directors/managers receiving weekly reporting indicating where their actual v. budgeted spend was on a weekly, monthly & quarterly basis
 - Performed IT Financial Planning using Hyperion's AOP Tool, for \$200 million; improved the oversight strategy that exposed unexpected expenses & risk analysis resulting in never missing the 5% plus/minus the quarterly budget variance
 - Helped ensure successful corporate finance rhythmic (forecast, quarterly business reviews, mid-quarter reviews, etc.) through coordination & communication with the organization by implementing Dashboard visualization tools, one-on-one weekly check-in sessions & end of month meetings
 - Drove deliverables & set goals, plans & schedules, that closely monitor project/program execution, propelling issue resolution & accepting the responsibility for ensuring successful achievement, these actions lead to a decrease of 14% in staff extra hours worked for quarter end reporting
 - Analyzed the needs of functional departments, provide various analyses & reporting, provide testing support for IT rollouts & processes, & develop new & modify reporting packages
 - Developed & manage the IT reporting packages; Drive the next generation annual planning process & tool development; PowerPoint, Automate Excel & create Tableau Reports
 - Functioned as a liaison between the IT Finance Planning & Business Development & contribute to strategic & tactical project deliverables while fostering & implement process improvement initiatives that provide department improvements

**Chevron Oil Senior Financial/Business Analyst
(Contractor)**

Second Tenure, January 2017 – September 2017

First Tenure, August 2013 - February 2014

- Implemented two systems (Asset Tracking & Asset Cost Allocation for labor, assets, & hard/software)
- Migrated multiple BUs on the SAP Platform to [Apptio](https://www.apptio.com); Collaborate w/solution consultants, tech leads & business SMEs; Implemented [Apptio's](https://www.apptio.com) Cost Transparency Financial System, enabling Business Units to track IT Spend pertaining to Labor,

**Internal
Public**

Vendors, Projects, Fixed Assets, & their utilized Applications based on their associated Cost Centers enabling the organization to do internal/external cost comparisons

- Lead communication between human resources, finance, accounting & other key Project Stakeholders reg. costs metrics
- Created & implement testing & validation efforts w/business SMEs & troubleshooting gaps that resulted in a 17% reduction in data transfer errors
- Coordinated & conducted more than 25 training seminars (companywide) that enabled the adoption of functionality
- Present complex financial models in a communicating the project's cost savings to non-technical/financial audiences
- Oversaw the creation of process documentation including functional requirements, business process requirements, technical design document, process flows & data migration specifications
- One of three business analyst who created a fixed and human asset tracking tool that contributed to a department costs savings of > \$25 million

Rocket Fuel Inc. Programming Analyst (Contractor)

January 2015 – December 2015

- Functioned as a Business Developer
 - Wrote code, in Excel's VBA, (using SQL extracts) that migrated sales data to move seamlessly among multiple sources; Eliminated manual processing & decreased the data error rate to less than 5% from a previous error rate of 30%+; Improved several data migration processes from an average of 1 week to an average of 4 hours, increasing migration frequency from a monthly process to a weekly process; Translated complex formulas using Excel-based VBA to design, analyze, & deploy

NTT Centerstance Senior Business Analyst

March 2014 – December 2014

- Served as primary resource on 5 Accounting & PSA systems projects for \$500K to \$1M business conversion engagements for clients' with 25-100 [FinancialForce](#) user licenses for this 6th largest global IT service firm. Delivered on time & within budget.
 - Functioned as external system administrator during first stage of operation
 - Performed ad-hoc financial analyses on \$50M to \$100M dollar business processes
 - Trained/supported end-users on Salesforce's Platform & Financialforce.com's accounting functionality; Identified more than 20 training opportunities & coordinated with internal teams to develop & deliver enablement tools & created an uploading process to populate 3 PSA migrations
 - Automated data migration among 3rd party vendors, proprietary systems & [Salesforce.com](#) (by way of APIs); Created process designs & produced visual flow diagrams & acted as the primary resource for both technology & business groups by re-engineering technical processes for greater efficiencies automating case management process

Salesforce.com Senior Business Analyst (Portfolio Planning)

February 2011 – August 2013

- Achieved more than 13% cost savings & a 80-90% workforce utilization for Technical Operation's \$50M budget executing enterprise-wide Agile development projects for new features/bug fixes via 3/year releases per year
 - Attained more than 50% reduction in project metrics definition time; Tracked, analyzed, & implemented over 150 enhancements; Improved by 23% employee work output level, maintaining clearly defined & monitored utilization rates
 - Decreased to 5% from 20% projects missing completion targets/& d& Decreased information request time by 67% from 3 hours to 1; Enabled informational flow to > 500 users eliminating requests on team resulting in a \$90K monthly time saving
