PROFESSIONAL EXPERIENCE

RANDSTAD NV   May 2021 – Current

Senior Front-End/Stencil/React/Angular Developer consulting at ECRI

- Primary role was to create a UI Library to be reused by React, Angular and Agnostic applications.
- Used Stencil as primary source of web-components and exported as React and Angular components
- Collaborated with UX Team for usability, accessibility and better standards.
- Wrote all the documentation in a easy to understand format using Storybook
- Was responsible to put together a NX Monorepo and leverage its CLI.

TRUST SECURE NOW   Feb 2019 – May 2021

Lead Senior Front-End/React Developer consulting

- Responsible for the redesign SAS dashboard
- Designed the API's to be consumed buy the application
- Designed and Developed all the UI, applying UX principles for better user interaction
- Developed mini framework, where the application know's from where to retrieve the data from and do auto save to the correct API.
- Responsible to setup the development environment using Webpack/React Admin/Material UI
- Due to legacy code being in CakePHP, I had to write some service in order to migrate to serverless.
- Backend is Serverless AWS, but all the API mockup was done using Firebase
- Migrated React application from Class based to Pure Function + Hooks, after React 16.8.0

WORKSTATE   Feb 2018 – Jan 2019

Senior Front-End Developer consulting for PublicStorage.com

- Developed modular components in React with Webpack, JSX, and CSS Modules.
- Transitioned all builds from imported CSS to preprocessed Sass architecture.
- Standardized design and development framework for product landing pages.
- Responsible for setting up Webpack/Gulp/React/Flow/Jest stack and teaching teammates how to work with new technology like ES6 and flow.
- Backend is .NET/Sitecore hosted on Azure Cloud Server
- Worked directly with customers design and development team

TGIX, Inc   Feb 2015 – May 2018

Lead Full Stack Developer Consultant

Equities.com:
- Operated as the Lead UI Developer to redesign their Social Network website which was inspired by Twitter/LinkedIn
- Also tasked to develop the workflow management for articles news, where there were several user groups, each one with specific roles.
- Was in charge of leading a team of up to 6 people, where half of the staff were working abroad.
- Backend was PHP/Joomla
- Hosted on AWS EC2 server and taking advantage of Elastic Cache (Redis) and storing data on RDS
- Interacted directly with customer CTO, getting inputs and approvals and every other week we had meetings in order to trace next steps.

Penguin Random House:
- Developed multiple WordPress-based websites.
- Tasked to work on complex UI elements for Sales process
- Developed module to export book catalog to PDF and Excel, based on user search result
- Gave support for a variety of Wordpress Blogs
- Streamlined the process to develop themes, by creating a white label theme, where all API calls and common functions resided.
- Backend PHP/Wordpress
- Hosted on AWS EC2 server and taking advantage of Elastic Cache (Redis) and storing data on RDS
- Every week I was required to attend meetings at customer location, so I could meet management, in house developers and UI/UX team.
- I was part of the team that was experimenting with React as a front end solution for Penguin Random House websites.

SENTIENT INTERACTIVE   Oct 2013 – Feb 2015

Senior Front-End Developer

- Front End developer responsible to translate design to interactive HTML, using the latest technologies such as HTML5 API's, CSS3 and jQuery, AngularJS.
- Adapted to multiple platforms and frameworks, such as Bootstrap, Foundation and at times building proprietary-based websites.
- Tasked to develop iPad Apps for the pharmaceutical industry using AngularJS and PhoneGap.
- As developer at Sentient, had the opportunity to work on projects for famous brands like QVC.com, LendingTree.com, Kowa, JacksonHewitt.com and more.

IDEAS NET STUDIO   2003 – PRESENT

Owner / Senior Developer

• INS was involved in many projects for companies like Porsche.com.br, GE.com.fr, NBA.com and much more.
• Adopted the latest technologies that drive innovative initiatives such as: HTML5, CSS3, PHP and JavaScript ES5, ES6, ES, etc.
• Take design decisions and coordinate with different groups it's implementation
• Organize and motivate teams to accomplish tasks and projects

DUMONDE TRAVEL   2000 – 2003

Full Stack Developer

• Created the very first web portal specialized for the South America Market.
• Developed a proprietary HTML website.
• Responsible for decisions related the stack to adopt
• Coordinated design decisions
• Developed UI as per requirement using latest technologies in place at the time.

NYNET   1998 – 2000

Web Developer

• First experience working professionally as web developer
• Developed a proprietary HTML website.

SIDE PROJECTS

BAMBOO THEMES   2011 – 2018

Owner / Full Stack Developer

• Owner/Lead Developer for all templates for a well-known template club Bamboo Themes.
• Was responsible for converting to Joomla a PSD design with responsiveness and good coding standards.
• Club templates are very challenging, because the very same design can be used in an enormous variety of industries, so we need to think of as many variables as possible when implementing parts of the design.
• Coordinate Design decisions and UI implementation with associates working remotely abroad
• Put in place an outstanding support group for clients and customers

OPEN SOURCE MATTERS / JOOMLA   2012 – 2014

Board Member

• Empower Joomla Events around the World
• Organize the Annual Joomla meeting, well known as "Joomla World Conference"
• Participate in tech events in many countries as featured speaker or representing Joomla Brand
• As board member, participate in board meetings and take decisions that would impact Joomla

Community
• Be a middleman between Joomla Community and Leadership team
