Project Details

Project 1: Techsaga CRM

Technology: C++, VC++, Visual Studio 2010, MySql

Description:

Techsaga crm is a client resource management tool used by the organization for managing the company and client relationships. It is also used for managing the organization's in-house management as handling the employee, manager and others data. The crm is created for handling the organization internal activity as well as the client relationships.

Project 2: Fast Hands

Technology: C++, VC++, Visual Studio 2010, MySql

Description:

Fast hand is an US based cleaning services projects where a customer book for cleaning service and when the service is booked, it is assigned to the driver and cleaner. Cleaner and driver goes to the customer's house for cleaning. I have worked on the admin panel of this project for handling the application data.

Project 3: Pearl Capital Markets (CRM)

Technology: VC++ STL, MT4 Manager API, VisualStudio2010

Description:

Complete process of tracking and managing MT4 trading platform leads (prospective customers) from generation of leads to their conversion into sales and long-term relationships. The data generated in this process is used in the measurement of the efficiency of the marketing and sales efforts.

Project 4: Edtia.org

<https://edtia.org/>

Technology: PHP Laravel, jQuery, Ajax, HTML and CSS, Bootstrap

Description:

Edtia is the global leader in e-learning platforms offering advanced skill development courses to corporations and individuals at incredible prices. Edtia is an online interactive learning platform that offers detailed online training in cyber security, Cloud Computing etc. Edtia offers you learning assistance from mentors and a community of like-minded peers to resolve any theoretical doubts.

Project 5: Zuhd.store

<https://zuhd.store/>

Technology: PHP Laravel, jQuery, Ajax, HTML and CSS, Bootstrap

Description:

Zuhd is an online kandora shopping site. It provides different types of fabrics for kandora. Zuhd is a platform where customers can buy the fabric and can interact with the tailor for kandora creation. Customers can choose the fabric type and size as per the different different steps and finally can order a complete kandora. Admin handles both tailor and customer as well.

Project 6: MacroChallenges

<https://macrochallenges.com/>

Technology: PHP Laravel, jQuery, Ajax, HTML and CSS, Bootstrap

Description:

MacroChallenges views the world as a place full of potential and by looking at each human being as a person deserving a chance, and it believes in the potential of every single person and gives them hope and courage to achieve their dreams. At MacroChallenges, we take a people-focused approach, catering to the needs and expectations of our clients. We build and strengthen relationships that allow us to connect quality candidates.
