Academic Project

Title: TRACKING OF FUEL ROAD TANKERS FOR ANTI PILFERAGE AND ANTI ADULTERATION

Team Size: 4

Description: The remote monitoring and control to fuel pipelines and fuel storage facilities at places such as fuel leakage can be realized by using this proposed system. This proposed system contains the data acquisition section and the collection section. Data acquisition section contains the pressure sensor, flow sensor, fuel sensor for monitoring the pressure, speed, and leakage of the fuel. The sensor values will be in analog format so; the proposed system has the requirements for the analog to digital converter to convert the value into digital. The values will be uploaded in internet via GPS modem using the PC. When any abnormality occurs in the sensor value then the buzzer will be invoked and alert the person.
