Project Brief [Service management –Jan 2020 to Dec 2020]

Here mainly we were supporting different client in resolving the technical query. The clients will raise the BUG in the client snow and we replicate the same Bug to accenture snow and after analysing the issue we assign to to proper technical team and follow up on the Bug until it gets resolved

Ingenico, Bangalore →July 2019 to Dec 2019

Project Brief

The project is mainly dealt with the SDK releases of the build. It is basically used to check the behavior of the OS level and the different applications embedded on the terminal (pin pad, Android and IOS phones, different series of swiping machines). This is tested on the swiping machines and also on the IOS and android phones. Here we also verify with the interface between the terminals and mobile phones and majorly verified with the different kinds of card transitions. Transactions could be made via GPRS, Wi-Fi or internet, we were verifying if the transactions were successful or not, when done transitions via various modes.

Declaration

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above mentioned particulars
