PROJECTS UNDERTAKEN

TITLE:	TICKET/SUPPORTSYSTEM
URL:	http://concerns.sanaatangroup.com In-house
CLIENT:	Software Engineer/DBA
ROLE:	

OVERVIEW: It is an issue tracking system (also ITS, trouble ticket system, support ticket, request management or incident ticket system) that manages and maintains lists of issues, as needed by an organization. It is commonly used for organization's customer support call center to create, update, and resolve reported customer issues, or even issues reported by the organization's other employees. A support ticket includes vital information for the account involved and the issue encountered. A ticket system often also contains a knowledge base containing information on each customer, resolutions to common problems, and other such data.

RESPONSIBILITIES:

- Customizing and configuring the application.
- Create & maintain all backend databases.
- Provide database administration on production, testing and development application servers.

TECHNOLOGY: ASP.NET, MySQL, HTML5, CSS3, jQuery, JavaScript
