RPA Developer - UiPath

SUMMARY:

- Overall 7 years 2 months of working experience.
- Around 3 years of experience as Robotic Process Automation Developer - UiPath.
- Working knowledge of UI Path and UI Path Studio for developing front office and back office robots.
- Experienced in using UiPath Studio, Orchestrator, Screen, Data, and Web scraping Techniques.
- Responsible for implementing the full life cycle of **RPA solutions**: Identifying automation opportunities, gathering requirements, implement, test and deploy targeted automation solutions using industry leading RPA - UiPath.
- Maintain several RPA bots, run bots on a daily basis as per schedule to provide higher RoI to the customer.
- Developed **ROBOTS** using **UiPath** to automate and **accelerate** 80% of standard business process with minimum human intervention for remaining non-standard processes
- Developed robots using UiPath studio, identifying and debugging the errors using **error handlers** and Participated in online meetings to demonstrate the capabilities of RPA for on-going projects and potential clients
- Worked with mainframe, windows, web application and **CITRIX** automation **end-to-end process** automation using UiPath.
- Created process model for **windows-based application** using **UiPath** and testing it in the inbuilt **controller** provided by UiPath Studio.
- Worked with **OCR, ICR** and Machine learning for designing in **UiPath studio** and with the UI team to design the appropriate icon and display for the screens.

Education:

Completed MBA in Financial Management from Kakatiya University in May 2011.

TECHNICAL SKILLS:

Automation Tools	RPA(UI Path)
Languages	VB Script
Databases	Oracle 10g/ SQL 2014

PROFESSIONAL EXPERIENCE:

Project # 1: **Month-end activity automation - SAP**

Development tools: **RPA (UiPath), Agile (JIRA)**
Role: **RPA Developer - UiPath**
Responsibilities:

- Involved in gathering requirements and preparing document for collected information.
- Took business requirements, current and future state process designs and translated them into process flows, creating UiPath work flows and sequences & packaging the tasks etc.
- Interacting with windows application and created Work flows and interacted all the other flows and sequences
- Handled **Foreign Currency update (OB08)** automation using web UI automation.
- Handled Foreign Currency Valuation (**FAGL_FCV**) automation.
- Used **SAP Logon**, **Call transaction** activities.
- Used **Take screenshot, Send Outlook Mail.**
- Preparing solution documents, developing code using UIPATH studio.
- Fixing the bugs raised by the QA team.
- Coordinated with Functional Team to find any gaps.
- Generated Email notifications and custom exception handling.
- Designing UIPATH process solutions in accordance with standard UIPATH design principles and conventions

Project # 2: **Vendor Invoice Management - Pepsico**

Development tools: **RPA (UiPath), Agile (JIRA)**
Role: **RPA Developer - UiPath**
Responsibilities:
- Involved in End to End development of Business Process using Robotic Process Automation.
- Took business requirements, current and future state process designs and translated them into process flows, creating UiPath work flows and sequences & packaging the tasks etc.
- Interacting with windows application and created Work flows and interacted all the other flows and sequences
- Problem solving issues that arise in day to day running of UiPath processes and providing timely responses and solutions as required.
- Used **Get Outlook Mail** and **Save attachments** to save the invoices (pdf) to the shared folder.
- Used **Abbey OCR service for Read PDF with OCR**, to extract vendor data from invoice pdf.
- Experienced in staging and deploying the automation solution into test and live environments.
- Communicating with UiPath product team on software related issues, suggested improvements and participating with other users in the UiPath community.
- Worked on Integrating applications like (Web, Services, Mainframe, MS Office, GUI, Outlook etc.) using workflow
- Worked on **Excel data reading**, **PDF reading**, **OCR** and Image recognition tools to access the un-readable text in different formats and different applications.
- Analyzing the user stories and breaking up the user stories into sub-task with estimation.

I hereby declare that the details furnished above are correct to the best of my knowledge and belief.
