Project #: 2

Project Title	Sales Cloud Implementation
Project Domain	Telecom
Duration	Feb 2019– Till Date
Solution	Salesforce.com Sales Cloud Solution
Designation	Salesforce Developer/Administrator
Team Size	5
Environment	Salesforce.com

Project Description:

Client had traditional sales and Marketing Process for creating and managing Campaigns, Lead and Opportunities. All prospects were captured on legacy systems, Excel sheet and on paper. It was very complicated process to convert leads to opportunity and close deals. There was no standardized process of deal closure and Quote generation. There was no data at one place and it was spread across different locations and different teams. We at Net Gyani proposed the client to implement Sales Cloud for streamline business process and standardise automated approval of quotes in order to increase lead conversion and sales intern.

At Net Gyani we have implemented Salesforce.com Sales Cloud Solution for automated lead capture from website, Social Media and Streamline lead conversion process providing record visibility across the teas using Salesforce Security Model. We also implemented sales process which suits client's business process with automated workflows, triggers and Approval process and implemented sales console for providing 360 view of customer's data and real time insights using sales reporting and Dashboards.

Roles and Responsibilities:

- Conducted requirements workshops with customer and gather requirements for Sales Cloud Implementation.
- Worked on solution design to map complex business requirements with salesforce.com functionality.
- Implemented Sales Cloud application with Configuration and Development
- Contributed in Unit Testing and System Integration testing.
- Deployment of Salesforce.com solution with the help of Change Set and Migration tools.
- Contributed to Data Cleansing, Data Loading and Exporting.
- Worked on Reports and Dashboards to provide real time inside of Data to organization.
- Worked on writing trigger for complex business logic.
- Developed Visualforce pages based on the requirements.
