Experience Details	
Project 1	Salesforce Integration with My SQL Server
Description	Setup the integration mechanism for one of the largest ed-tech in north India. Created integration bridge to get the data from the SQL server based on several factors (business unit, Session, server etc.). Setup the bridge in such a way that the customer can easily control the entire integration bridge without any dev support.
Role	Solution Architect

Experience Details	
Project 2	Salesforce Integration with Amazon web Server for a fin-tech startup (Bengaluru)
Description	The lending kart uses Cloud Lending Solution Tools (Salesforce) to automate their business procedure. I worked on the integration salesforce with other AWS to make the data flow smooth in the system. I have created triggers and email

	templates to automate the salesforce.
Role	Solution Architect

Project 3	Integrated Salesforce with Razor Pay for healthcare
Description	I have integrated Razor Pay to get the payment link and other useful features in salesforce itself without moving out of salesforce. It helped their users to manage their customers and their payment information at one place, which ultimately helped them to increase their productivity. I have made that feature so configurable that their admin can easily configure Razor Pay with salesforce.
Role	Salesforce Developer

Project 4	Integrated ERP system with Salesforce for one of the apple stores
Description	We have created the sales operating mobile app for invent in which I have integrated ERP with salesforce to get the leads and customer information with API integration. We have created an. automation which gets all the Data from ERP at regular intervals with batch apex and schedule apex.
