## OBJECTIVE

To obtain a Senior Developer position focusing on current Microsoft technologies, agile and enterprise level methodologies, on a team with passion and purpose, focused on end-user experience, proven practices/patterns, and high product quality.

## SKILL SUMMARY

I am a software developer with over 10 years' software development experience in a variety of industries. I am a strong team player, quick learner and can easily adapt to new technologies. I possess excellent communication skills, as well as innovative and practical problem-solving skills. I work well in both large and small teams and am comfortable working in all application layers.
