- Experience in analysis, requirements gathering and solution development.
- Good analytical and communication skills, team player, committed to work and adaptable to new technologies.
- Very good experience on migrating data to other environments.
- Strong debugging and problem-solving skills with excellent understanding of system development methodologies, techniques, and tools.
- Performed the unit testing, SIT & UAT support.
- Good Experience and Gen2 and Gen3 in OIC.

Skill Set:

Tools	WinSCP, Putty, HDL, FBDI, BIP, OTBI
Oracle Fusion Middleware	Oracle OIC, OCI
Cloud Platforms	Oracle Cloud
IDE & Editors	Soap UI and Postman
Project Management	Agile
Operating Systems	UNIX, Windows 95/98/2000/XP, Linux
DBMS Tools	SQL Developer
RDBMS	Oracle 9i & 10g

Organizational Experience:

➢ Working in HCL Technologies Pvt Ltd, **Bangalore** as Technical Consultant from **June 2021 to Till Date.**

➢ Worked in Tech Mahindra as Software Developer from **May 2019 to May 2021.**

Academic Details:

➢ B. Tech from JNTU University

Project #3

Client	:	SCG Logistics
Role	:	Technical Consultant
Period	:	From May 2022 to Till Date
Environment	:	Oracle Integration Cloud, Oracle Fusion ERP

Description:
SCG Logistics Management Company, Ltd. provides distribution and logistics services. The Company offers transportation, warehouse, product handling, logistics solutions design, cross border, and custom and formality services. SCG Logistics Management serves and distributes goods throughout the world.

Responsibilities:
- Developed total 13 integration of Inbound & Outbound, FBDI, Non-FBDI & Event based in App driven and Scheduled Orchestrations.
- Involved from initial discussion with customer, proposals, estimation, planning and execution Data migration using FBDI in Oracle Fusion Cloud using OIC
- GL interface integration from ERP to cloud using OIC tool.
- Designed publisher and subscriber integrations and sending notifications.
- Developed Agent configuration in OIC sending data to hybrid ERP Model.
- Design and develop integrations in OIC to Oracle ERP Cloud including extracting Oracle ERP Cloud data using BI Publisher reports, analysis and OTBI Reports.
- Involved in project from requirement gathering, design, develop, test, Go live and support of interfaces at client location.
- Configuring and using Email Notifications in OIC to notify users errors and success of records.
- Prepared technical design (MD70/CV40) documents, unit test (TE20).

Project #2

Client   :   Editas Medicine
Role   :   Associate Consultant
Period   :   From June 2021 to April 2022
Environment :   Oracle Integration Cloud, Oracle Fusion ERP

Description:
Editas Medicine, Inc., is a clinical-stage biotechnology company which is developing therapies for rare diseases based on CRISPR gene editing technology. Editas headquarters is located in Cambridge, Massachusetts and has facilities in Boulder, Colorado.

Responsibilities:
- Developed total 8 integration of Inbound and Non-FBDI in App driven flow.
- Build complex integrations between various 3rd party system & Oracle OIC using SOAP, REST APIs.
- Gathering business requirements for enhancements, customizations and developing technical requirement documents and worked on file generation process for data loader format.
- Understanding the requirements and design specifications. Preparing estimates based upon the custom requirements and preparing project schedule.
- Testing and documenting all code changes, this includes unit testing, component integration testing, system integration testing and performance testing.
- Publish and Subscribe approach in OIC to connect On Premise Application using OIC Agents Configuration. Developed Agent configuration in OIC sending data to hybrid ERP Model.
- Created EBS adapter and Logistic adapter in OIC and Implemented Event Based Integrations in OIC.
- Prepare the Technical design document and get it approved by Solution Architect.
- Created Lookups for static derived values in Oracle OIC.
- Deploy the integrations between the OIC environments using import/export features.
- Prepared the Build & Support Hanover documents.
- Identifying risks proactively and proposing solutions to resolve them.

Project #1

Client   :   British Telecom, UK
Role   :   Software Developer
Period   :   From May 2019 to May 2021
Environment :   OIC, Oracle Fusion ERP, BI Report
