PROJECTS

Hospital Management System
Skills Used: JSP,JAVA, Wamp Server, NetBeans

01/2018 - 05/2018   *Team Mamber- 2*

The hospital management system is basically made to minimize the time for patients. And in this project, we make some modules like a doctor, patient, admin. In the doctor module, the doctor can see the appointment, and which medicine give to which patient. And In the patient module, the patient can take the appointments to the doctor and see all the information about him. And In the admin module, the admin can manage the doctor and patient data.

Job Portal
Skills Used: PHP, Wamp Server, NetBeans

01/2019 - 05/2019   *Team Member- 2*

My idea is to provide a job opportunity easily with a single click. Once you make the profile on the website that you can find the job which is match by your profile and then with only a single click you can apply for the job. And in this project, we make an admin module to manage the all information.

Quick Sell
Skills Used: PHP, Wamp Server, NetBeans

07/2019 - 11/2019   *Team Member- 4*

My idea is to provide buy and sell old products in colleges and universities. just like books, wifi, and pass out student luggage. There are many students who belong to a poor family and he is want to buy a book on less price then they can buy it on quick sell. And students want to buy old cooler in our university and college areas they can buy it if anyone sells the cooler.
