OBJECTIVE:

Detail oriented learning and practice in salesforce trailhead and knowledge of programming, and end to end development. Aiming to enhance my knowledge and hone my skills as a Salesforce Developer.

WORKING KNOWLEDGE:

- Work Flows, Validation Rules, Process Builders
- Customize Reports and Dashboards
- Debug, check and fix Apex Codes
- Implementation of Lookup, Master-Detail and Junction Object Relationships
- Setting up Profiles, Users, Page Layouts and Configuring Org Wide Hierarchy.
- Use of Data Loader to Import and Export Data in Bulk to and from Salesforce Org.
- Scheduling and monitoring various Batch Classes.
- Custom Objects, Validation Rules, Formula Fields, Approval Process and Auto Response to Automate Business Logic.
- Created Lightning Components from scratch using Lightning Design System, App Builder and Lightning Component Features.
- Extensive use of Console Log to check and debug Apex Components.
- Use of CSS and Design Parameters to improve look and feel of Lightning Components.
- Worked with Salesforce Native Lightning Components: Lightning Card, Lightning Data table, Lightning Accordion.
- Minimized Code in Java script Controllers by Adding Reusable Functions in Helper Components.
- Integrated Apex with External Websites.
- Writing Test Classes and Test Suites to Maintain Full Code Coverage.
- Developed Various Apex and Controller Classes.
- Use of Apex Triggers and Context Handlers for their Trigger Events.
