Provider side.

Certifications

- Completed a certification for Automation Anywhere RPA Tool v11.
- Completed a badge for Business Analyst in Automation Anywhere RPA Tool v11.
- Completed a certification for MATLAB ONRAMP which gives the basic idea on MATLAB.
- Completed UiPath RPA Starter course on UiPath Academy.
- Completed BluePrism Foundation Training on BluePrism Online Academy.

Projects Summary

Edits Automation:

Technologies & Tools Used: Excel VBA, EHLLAPI

- This project was developed for one of the largest insurance companies in the US. Their Automatic Claim Adjudication System (ACAS) throws the claims for manual processing which failed the auto-adjudication process.
- These claims will have messages called Edits which will tell why the auto-adjudication failed.
- An automation was developed using Excel VBA by referencing EHLLAPI to resolve the Edits on the claims. This is done for two different teams of Aetna - US Claims and PTH Claims.
- The automation first programs some basic validations on the claims and then processes the edits one by one until all the edits are resolved.

Eligibility Checking through Automation Anywhere:

Technologies & Tools Used: Automation Anywhere

- This Project was developed for the operator of one of the largest clinical laboratory networks in the world with a United States network of 36 laboratories.
- Availity acts like a gateway for inquiring claim information, eligibility and authorization details of the services rendered by the patients.
- Through Automation Anywhere we developed a bot which can run 24*7 to complete the task and in less time as compared to the agents working on this.
- Bot was able to fill up the required details and get the output in an excel for each claim within 50 seconds.

CMS Application Testing:

Technologies and Tools Used: Selenium, Manual Testing

● CMS (Claims Management System) is a workflow management system for healthcare providers.
● Some of its features include - work assignment, reporting, user management, team management, quality auditing, request tracing. It is a SISA certified application with more than 2000 users across India, US and Philippines.
● Performed different types of testing like Functional testing , Regression Testing, Retesting. Prepared test Scenarios, Design Test cases, and Defect analysis, defect report.
● Prepared test Scenarios, Design Test cases, and Defect analysis, defect report.
● Execute the test case to meet customer requirements.
● Involved in reviewing test cases and sending review comments to colleagues.

Educational Details

● Bachelor of Engineering in Information Technology from Bharati Vidyapeeth College of Engineering, Navi Mumbai affiliated to Mumbai University with CGPA 6.72, 2018.

Achievements

● Received Appraisals from Clients.
● Received a 'Top Performer' certificate for the month of November 2018.
