## WORK EXPERIENCE

### CONSULTANT

**KPMG GLOBAL SERVICES, BENGALURU**

July 2021 to Present

Responsible for API development for an insurance integration platform.

- Work with open API generator libraries and mock web servers.
- OpenTelemetry integration with NewRelic for microservices.

Responsible for migration of trade surveillances from old to new data architecture for a leading global investment banking firm. Worked mainly on Java, Python, Hadoop/Spark, Shell Script, SVN and Git.

- Understand the complex business logic, data fields consumed and working of existing surveillances.
- Bug fix, enhancement of existing code.

### ASSOCIATE IAM

**SECUREKLOUD TECHNOLOGIES, CHENNAI**

February 2021 to July 2021

Responsible for developing a blockchain infrastructure automation platform. Worked on Spring boot, NodeJS, Kubernetes, Jenkins, Hyperledger Fabric, Ethereum and SVN.

- Automate the deployment of an application in Kubernetes cluster by exposing APIs generating yaml files in runtime as per user inputs and leveraging Kubernetes commands.
- Server-side pagination, Rest API design for web application.
- Migrate image repository from private registry to AWS ECR by creating secrets, cronjobs in Kubernetes cluster and perform necessary configuration changes in Jenkins pipeline.

### SOFTWARE ENGINEER

**SOLARTIS TECHNOLOGY SERVICES, MADURAI**

June 2018 to February 2021

Responsible for developing an in-house platform for monitoring micro services, application performance. Worked on Java 8, Spring MVC, Spring Boot, Maven, Hibernate, MySQL, MongoDB, ActiveMQ, Tomcat, HTML, CSS, Javascript, ReactJS, Gitlab.

- Develop a service to download the HTTP request/response XML files stored in remote server using Spring Boot.
- Develop a custom log handler to send Jboss EAP server logs to ActiveMQ queue.
- Automate manual tasks involving data reporting and auto-emailing the results using shell script, ETL tools.
