Projects Experience

#1 Lightning Activity Analyzer

Team size : 4

Project term : 6 month

It is a Salesforce AppExchange product. This component shows all open and completed tasks for the record in a way that is summarized by user and time-frame. User can see list of all tasks starting from jan to dec and can get detailed info for the same in just one click.

Responsibility

- Requirement gathering and understanding
- Development of component and UI enhancement
- Preparation of aura documentation
- Unit testing

Environment

- Salesforce lightning, Apex, SOQL

#2 Amazima Ministries – Upgrade Students

Client – Cloud for good

Team size: 1

Project term: 6 month

This VF was designed to upgrade amazima students to next level of standard, based on its current school and current subject chosen.

The project involves various tasks related to Visualforce pages, controller, and wrappers.

Responsibility

- Project Documentation

Vivek Jaiswal Resume

- Requirement gathering, design and analysis, development, unit testing, test class creation
- Clarifying client requirement via call and email.

#3 Education Pioneers

Team size: 2

Client: Cloud for good

Project term: 2 months

Following assignment, I have worked upon using analytic report charts

1. Drill-down reports, with filters applied
Used analytic report charts that renders as per applied filters
2. Used Data table to display records
 - Conditional highlighting of field values
 - Customized it for pagination, applied sorting on column's onclick

Responsibility

- Requirement gathering, design and analysis, development, unit testing, test class creation, deployment to production
- Ensured that the process is documented and communicated well through daily status report which is been sent to Project Team.

#4 Miscellaneous

- Worked independently in creating Global Ip managed package to add all Ip ranges in Network access using Metadata Api.
- Worked in development, bug fixtures in various lightning apps.

Over all work profile:

- 5+ years of Experience as a Devops tools like **Docker, Kubernetes, Terraform, GitHub, GitLab** and **Jenkins**.
- 5 Years of experience as a Linux Administrator, where I was responsible for the security of **Linux Web Server and Applications** like, **Apache, DNS, MySQL Server, Email Server**.

Responsibilities As Salesforce CPQ Admin

- Supported the project's end-to-end implementation in Sales Cloud, Service Cloud and Community Cloud.
- Configured Products, catalogs, Catalog Hierarchies, **Bundles, Bundles within** bundles, and price lists **across all products**.
- configured a complete PLI with different Charge Types and Charge Type Criteria combinations for all the Products and Services.
- Involved in end-to-end QA and UAT testing and validation of CPQ, including Products, Pricing, quoting, etc.
- Various pricing factors like variance pricing, volume-based pricing, and attribute-based pricing have been configured.
- Configured the complete attribute-based pricing and Price Matrices.
