## **PROJECT PROFILE:**

### **Project #1:**

Title	: <b>MAERSK Migration</b>
Client	: <b>Maersk Logistics</b>
Environment	: Azure Data Factory, Azure Sql.
Role	: AzureDeveloper.

### **Description:**

Maersk is a Danish integrated shipping company, active in ocean and inland freight transportation and associated services, such as supply chain management and port operation. Maersk has been the largest container shipping line and vessel operator in the world since 1996. The Company is based in Copenhagen, Denmark, with subsidiaries and offices across 130 countries. It is a publicly-traded family business, as the company is controlled by the namesake Møller family through holding companies. In September 2016, Maersk Group announced that it was splitting into two separate divisions: Transport & Logistics, and Energy.

### **Roles & Responsibilities:**

- Created Azure data factory pipelines with set of activities.
- Created SQL tables to store the processed results in a tabular format.
- Completely involved in the requirement analysis phase.

### **Project #2:**

Title : **SENEGENCE SITES CONTENT MIGRATION**  
Client : **SENEGENCE**  
Environment : SQL, Azure Data Factory.  
Role : Azure Developer.

### **Description:**

Senegence is one of the world's largest beauty companies and the largest fragrance company, with over \$9 billion in revenue for the fiscal year ending in June 2018. Senegence acquired 41 beauty brands from Procter & Gamble in 2016, becoming the global leader in fragrance, the second largest company for hair color and styling products, and the third largest company for color cosmetics. The company operates three divisions: Consumer Beauty, which focuses on body care, color cosmetics, fragrances, and hair coloring and styling products; Luxury, for luxury cosmetic, fragrance, and skin care products; and Professional Beauty, which services beauty salon and nail salon professionals. Senegence's mission is to "celebrate and liberate the diversity of beauty".

### **Roles & Responsibilities:**

- Created Azure data factory pipelines with set of activities.
- Created SQL tables to store the processed results in a tabular format.

Completely involved in the requirement analysis phase.

**Project #3:**

Title : **Diageo outlet Analytics**  
Client : **Diageo**  
Environment : Azure Data Factory, Azure SqlDW, Power  
BI.Role : Azure Developer.

**Description:**

The driving purpose of the Diageo Analytics project is to develop a global digital analytics practice providing measurement and actionable insights for marketing activities across multiple channels through the customer journey from discover to explore, buy and engage. To build digital excellence by providing guidelines and tools which enable marketing employees to make informed decisions about digital strategies and tactics.

The solution proposed will leverage the Azure analytics, to enable the goals set out by Diageo. It is a cloud enabled solution which leverages Software as a Service (SaaS) and

Platform as a Service (PaaS) offerings within the Microsoft Azure Service. Data from all channels and sources will be ingested, processed, and persisted in the cloud.

**Roles & Responsibilities:**

- Created Azure data factory pipelines with set of activities.
- Created SQL tables to store the processed results in a tabular format.
- Completely involved in the requirement analysis phase.
