| CDAC-ACTS | Python, Cloud Computing Nodejs, Edge Computing, No-SQL, Time-Series Database | 6 months |
| CSIR-NPL | LabVIEW | 6 months |
| Brainsoft Software Pvt. Ltd. | Core Java | 3 months |

Technical Skills:

Programming Language : Experience on: NodeJs, JavaScript
Understanding Knowledge: Angular 6, MEAN, Python.
Database : DynamoDB, MySQL, MongoDB, Quickblock.
OS : Linux, Windows 7.

Projects Details:

Project1:

Title : Nexus

Role : Worked on Backend, Created REST API in NodeJs using Serverless Framework and MySQL as a database, Used Plaid a third party app for financial institutes.

| | |
|-----------------------------|--|
| Objective | <ul style="list-style-type: none">• App for managing financial data. |
| Key Responsibilities | <ul style="list-style-type: none">• Responsible for building app for business and finance investors.• Development and Testing through automation chai mocha selenium tool.• Own and drive technical solution presentation. |
| Project Summary | <ul style="list-style-type: none">• Nexus is an online Account Management system where one can manages all Financial Accounts, Properties, Loans, etc. Build on Angular 6 for frontend and Nodejs at server side. |

Project2:

Title: EvenShot

Role : Worked on Backend and Frontend too, Created REST API in Nodejs using Serverless Framework and DynamoDb as database,Used Braintree a third party API for transaction,Voucherify for vouchers and google places API for location.

| | |
|-----------------------------|--|
| Objective | <ul style="list-style-type: none">• App for establish business. |
| Key Responsibilities | <ul style="list-style-type: none">• Responsible for building app for business and customers.• Development and Testing through automation chai mocha selenium tool.• Own and drive technical solution Presentation . |
| Project Summary | <ul style="list-style-type: none">• EvenShot is an online Business establishment app for customers and investors system where one can manage all Business Products. Build on AngularJs for frontend and Nodejs at serverside. Used Braintree third party API for bank transaction and Voucherify third party API for generating vouchers and gifts for particular product. |

Project3:

Title: EventsWeDo

Role : Worked on backend and frontend technology, Created REST API in Nodejs using Serverless Framework and MySQL as a database, Angular 6 for frontend to integrate Cognito with AWS-Amplify.

Platform: Linux.

| | |
|-----------------------------|--|
| Objective | <ul style="list-style-type: none">• Build an API for business and marketing. |
| Key Responsibilities | <ul style="list-style-type: none">• Responsible for building API for business and marketing purpose.• Development and Testing through automation chai mocha selenium tool.• Own and drive technical solution Presentation . |
| Project Summary | <ul style="list-style-type: none">• EventsWeDo is an online events management app where one can manages all events like photography, marriage purpose events, etc. Build on Angular 6 as a frontend side ,integrated aws-cognito through aws-amplify for login ,sing up and user management. Nodejs used at server side. |

Project4:

Title: OTC

Role : Worked on Backend, Created REST API in Nodejs using Serverless Framework and DynamoDB as a database.

| | |
|-----------------------------|---|
| Objective | <ul style="list-style-type: none">• Build an API for business and marketing. |
| Key Responsibilities | <ul style="list-style-type: none">• Responsible for building API for business and marketing purpose.• Development and Testing through automation chai mocha selenium tool.• Own and drive technical solution Presentation . |
| Project Summary | <ul style="list-style-type: none">• OTC is Business management API where one can manage all Business data and marketing method. Build on Nodejs at server side. |

Project5:

Title: Hringly

Link: <https://www.hringly.com/>

Role : Worked on Backend, Created REST API in Nodejs using Serverless Framework and DynamoDB as a database.

| | |
|-----------------------------|---|
| Objective | <ul style="list-style-type: none">• Build an API for Job seekers and organisation. |
| Key Responsibilities | <ul style="list-style-type: none">• Responsible for building API for Job seekers and organisation purpose.This is our product for those are job seekers and also not known about their result and interview feedback by organisation.• Own and drive technical solution Presentation . |

Project Summary

- HRingly is the product for job management API where one can manage all job seekers and organisation related data and interview,feedback,joining method. Build on Nodejs at server side.

Educational Qualifications:

- **Master of Technology** in **Computer** Technology with 8.2CGPA from Amity University in the year 2016 .
- **Bachelor of Technology** in **Computer** Technology with 73%(Approx.) from UPTU .
