Gaurav Singh
Blockchain Developer and Architect

gs94gauravsingh@gmail.com

8093682248/8083426701

Navi Mumbai, INDIA

Aiming to work as BlockChain Developer and enhance trust in digital business by creating high quality algorithms and Smart Contracts

WORK EXPERIENCE

Smart Contract Developer
TCS

01/2017 - 07/2019   *Pune*

Achievements/Tasks
- Worked on Blockchain Project named Delivery Management.
- Smart Contracts using Solidity.
- Use of MetaMask and Truffle.
- Worked on Machine Learning project named Promo Finder.

Blockchain Developer and Architect
Era Swap Life || BLOCKLOGY

07/2019 - Present

Achievements/Tasks
- Working to address problems of farmers. We had built one stop solution for farmers community. In building this, I am working extensively on Blockchain, Machine Learning and IoT devices.
- Worked on Architecture and Development.
- Worked as developer and promoted to lead the team.

Drafted a WHITE-PAPER
Era Swap Life

Achievements/Tasks
- Drafted and designed the concept, architecture and related peripheries of project.

EDUCATION

B.Tech
BPUT

07/2012 - 05/2016   *Bhubaneswar*

Courses
- Electronics And Telecommunication

BLOCKCHAIN DEVELOPMENT
Certified by COURSERA and IBM

Courses
- BlockChain Developer Program

SKILLS

Ethereum · Solidity · Smart Contract Development · Hyperledger · Machine Learning · Robotics Process Automation · Regression Techniques · Cryptography Algorithms · Node.js · Truffle · MicroServices · Consensus Techniques · Cassandra · MySQL · Python · Linux · JavaScript · Fabric · web3.js · Ganache · MetaMask

PROJECTS

FARMERS VALUE
- Working to create on stop solution for farmers. Here, I had worked on machine learning and blockchain technologies to create some smart decision and transparency in whole process.

PromoFinder
- We created an algorithm using Machine Learning techniques to provide most suitable promotional offers to desired customers. We had used PYTHON programming language to work on this.

OWNERSHIP AND GOVERNANCE
- Using HYPERLEDGER, worked on converting individual properties into digital shares on the blockchain. It is aimed to create divisible real estate with equity and ownership to all.

DELIVERY MANAGEMENT
- Created several SMART CONTRACTS with help of SOLIDITY language. It is designed to take care of actual status of all items (inventories of our client) from warehouse to customer.
