- JavaScript
- HTML & CSS
- Basics of Java

ORGANISATION PROJECT DETAILS

SVIKA (Point of Sale)

SVIKA is the Point of Sale developed by Inviratech. SVIKA uses NetSuite as the database for the master details, sales transactions and analytics. The sales are made through SVIKA as well as directly into NetSuite. The sales made through POS are synced to NetSuite and the transactions created in NetSuite impacting the products inventory are synced back to POS. Multiple bundles are created based on the products design and the additional client requirements.

Kimray

1. **Windchill Integration**

Integration between NetSuite and Windchill to handle Quality Management System is developed. Cases, in NetSuite, are used to capture information on defects/issues with products. If the case is a quality issue, then NetSuite will push the case details to Windchill. The final resolution is established in Windchill and is pushed back to NetSuite.

2. **AFS Integration**

NetSuite will make a call to AFS to request rates for a specific Sales Orders, Transfer Orders, and RMAs. AFS will return a list of carriers, rates, and transit times. One of the option from the returned list is to be selected in NetSuite which has an identifier to link with AFS to provide confirmation of the booking. AFS then returns a BOL and tracking number which is saved on the transaction from which the call is made.

3. **Infor XA Integration**

NetSuite will make a call to XA with line item details to determine the promise date for a given quantity of item being ordered which is communicated to the customer when they can expect the order. The calls to XA is also made to update the promise date if requested by the customer or cancel the item being ordered. Once the promise date is calculated in XA it is pushed back to NetSuite.

Mitchell, Genex and Conventry (Enlyte)

1. **SFTP to NetSuite Integration via Boomi flow**

Querying files from different folders of the SFTP, processing each file to create JSON object which is passed to the Restlet to create two staging records having parent child relationship along with validations and error notification email sent for error occurred while processing files.

2. **Salesforce Accounts to NetSuite Vendor Integration via Dell Boomi**

Salesforce trading partners once created were pushed to NetSuite via the Boomi flow as a custom staging record. Once approved, NetSuite vendor record is created and the details are pushed back to Salesforce for cross referencing in both systems.

3. **Salesforce Bills to NetSuite Bill Integration via Dell Boomi**

Salesforce bill were pushed to NetSuite via the Boomi flow as a custom staging record. Once approved, NetSuite bill is created and the details flows back maintain the cross referencing.

4. **SFTP to NetSuite integration via Boomi flow**

Employees detail file is added to the SFTP on each day basis to create a new employee and its vendor record or update an existing employee and its vendor record in NetSuite. The Boomi flow store the added file in NetSuite file Cabinet and calls the Resltet script to do further processing.

5. **Vendor Bill Payment**

A form via Suitelet is used to submit the bills to create vendor payment. The Map reduce script transforms a vendor bill to payment or creates a payment for multiple bills based on the filter selected on the form and grouping of the different bills based on grouping fields values available on the bills.

CellResearch Corporation

1. **Shopify to NetSuite Integration – Celigo Integrator**

The Sales order in Shopify are pushed to NetSuite using the Celigo Integrator tool. The Celigo inbuilt Shopify app was installed and the connections were established and mapping of the fields were done successfully for a smooth integration between the systems. NetSuite scripts as required were developed as required.

StayMobile

1. **NetSuite to Tulip (Purchase order and Item receipt)**

Tulip makes a get purchase order details request from NetSuite, processes and then makes a post request back to receive the purchase order in NetSuite.

2. **NetSuite to Tulip (Sales order and Item Fulfillment)**

Tulip makes a get request for sales orders details from NetSuite, processes and then makes a post request back to fulfill the sales orders in NetSuite.

3. **NetSuite to Tulip (Generate Document)**

Tulip sends a post request along with the required details in body to generate PDF file which is saved in file cabinet and the file url is sent back in the response.

Mission Critical System

1. **Custom Commission Module for Sales Rep, Sales Manager and Sales VP**

Developed a custom commission module which includes commission plan, tier codes, tier percentages and employee's quota, cumulative gross profit for the quarter, current gross profit for the paycheck date, draw.

2. **Product Tracking Custom Module**

Developed a custom module which provides the ability to create a product tracking record to keep the track of the maintenance period for a customer purchasing from a manufacturer. Also provided the functionality to bulk create / update opportunities for a new product purchased or renewal of the maintenance for already purchased product.

3. **Time Tracking and Approval workflow**

Developed a custom solution for the timesheet approval process for only the Engineering department.

4. **Migration from Standard instance to One World**

Cabin Air

1. **Custom Pallet Serial Numbers module**

NetSuite inventory details serial number insert box has a limit of 4000 characters so a custom module was created having a pallet record as parent and serial number as child record. The pallet denotes the lot number and the serial numbers count denotes the quantity in that lot number. This module is used across Item Fulfillment, Item Receipt, Inventory Transfer, Assembly build to have a related record relationship.

2. **Custom Quality Process**

Quality process for the Assembly items is developed which in the last process provides a PDF certificate for the product quality.

Mahaffey

1. **HubSpot Integration**

The leads were created in hubspot and after the leads are converted to qualified leads they are moved to NetSuite as a lead record.

The Cary Company

- 1. Listrak Email Campaign Integration**
Developing and testing of Scripts in NetSuite for Order Confirmation, Order Processed and Order Shipped emails to be sent from Listrak to customer email id.
- 2. Emarsys Email Campaign Integration**
Developing and testing of script in NetSuite to create PDF of Quote and to send email to customers with the PDF as its attachment.
- 3. Shipper HQ Integration**
Developing and testing of Script in NetSuite to provide the required data to Shipper HQ API to obtain the correct shipping carrier and rate and to use the response to provide the user to select the shipping carrier and then setting the shipping cost according to the carrier selected.
- 4. Inventory and Price tiers live sync with Magento**
Developing and testing of Script in NetSuite to make the Inventory and Price tiers of Inventory Item to be real time synced with Magento.
- 5. Group Item price tiers and Inventory Sync with Magento**
Developing and testing of Script to create the price tiers for Group Items according to the member item price tiers and quantity pricing and make the price tiers and inventory to be real time synced with Magento.
- 6. Customer Address Sync to Magento**
Developing and testing of script for real time customer address sync with Magento when the customer address is added, updated or deleted from NetSuite.

Precision Orthopedic

- 1. SFTP Integration**
Developed a custom solution to daily create payment transactions in NetSuite by downloading the payment csv file from the SFTP server.

Hero Digital LLC

- 1. Custom Email Approval for Vendor Bill and Invoice**
Developed a custom approval workflow with Email plugin to provide the ability to approve the vendor bill and customer invoice without logging in to NetSuite.

EDUCATIONAL QUALIFICATION

- Master of Technology (**M.TECH**) in VLSI from G.H. Rasoni Academy of Engineering and Technology affiliated to R.T.M. Nagpur University [**67.30%**] in **2016**
- Bachelor of Engineering (**B.E**) in Electronics and Telecommunication from Guru Nanak Institute of Engineering And Management, Nagpur affiliated to R.T.M. Nagpur University [**55.20%**] in **2013**
