PROJECTS

DigiHome (Current)
User signup with mobile number. The user can add the document, the reminder can also be created at the time of document creation, and the user gets a notification that when his document is expiring, there is a notification system. Used AWS S3 for uploading files, it also used AWS SQS in it. User can also create to-do for any type of work with due date and reminder also set work priority based on work or task. There is a notification system. We use third-party API for this project like OCR Scan, and DVLA for vehicle information and Brand fetch for the brand logo. I mainly involved development, code optimization and Bug fixes. for the app interaction form server, I have developing REST API, using the Express js, Typescript language. Using mongo DB for database interaction and store data.

DigiHome Admin Panel
created admin panel where admin can approve or reject document, delete users, user properties, task, spaces, logos edit or delete. Also scan document and with bar code or model number. I have developing REST API, using the Express js, Typescript language. Using mongo DB for database interaction and store data. And for frontend development I am using Angular 12 and HTML, Bootstrap CSS. User can Visit: https://staging.admin.digihome.app/#/authentication/login

Veera Tickets
In this project, provide a platform where organizers and users connect. The organizer can create an event and users can buy tickets for that particular event ticket we use blockchain for generating ticket id. Users can buy tickets buy their choice seat availability, project show seat number, and available tickets for an event. I mainly involved development, code optimization and Bug fixes. for the app interaction form server, I have developing REST API, using the Fastify, JavaScript and clean architecture Node.js language. Using PostgreSQL for database interaction and store data. User can Visit: https://veraticket.com/

Homeonline.com
E-Commerce Real Estate Portal by Dainik Bhaskar Group where users can buy/sell/rent property and household items. User related modules Post Your Property, Offers Section, Inventory Section, Property Detail, Log Management in whole product, Search Module on Desktop & Mobile, SEO Development, Login System. I mainly involved backend and development, code optimization and Bug fixes. for the app interaction form server, I have developing backend for add data and front end for user interface, using the PHP framework CodeIgniter, JavaScript, jQuery, HTML, CSS, AJAX. Using MySQL for database interaction and store data User can Visit: https://www.homeonline.com/

IT SUPPORT
Project is to make an online helpdesk system. Provides Department to register and create their own domains Support site can be customized Multiple users can access Tickets can be generated on each new email IT Support panel we assign transfer claim tickets member and team wise. I have developing backend for add data and front end for user interface, using the PHP, Oops Concepts, JavaScript, jQuery, HTML, CSS, Pjax. Using MySQL for database interaction and store data. User can Visit: https://itsupport.mp.gov.in/

MP Invest Portal
Projects provide for registration of MSME projects and fund generation by investors. there are some main modules MSME Incentives, Questionnaire, Investor Wizard to guide an investor about customized list of approvals/services, Investor can apply for all services provided through D-CAF. I have developing backend for add data, using YII2, PHP, HTML, CSS, AJAX, JAVA SCRIPT, jQuery, JSON. Using PostgreSQL for database interaction and store data. User can Visit: https://invest.mp.gov.in/

State Portal for COVID-19 Monitoring
In this portal, we track covid patient first an individual adds as suspect and after testing if the patient is positive. Then update his entire cycle on the portal and also update the report. We can track all treatment of patient and hospital information. Bed fees, charges and equipment availability.
I have developing backend for add data, using PHP, CodeIgniter, HTML, CSS, AJAX, JAVA SCRIPT, jQuery, JSON. Using MySQL for database interaction and store data. I am also using master slave concept for generating fast report.
User can Visit: http://sarthak.nhmmp.gov.in/covid/
