Career Objectives

To harness and tone my skills in association with a progressive firm which provides a good working environment and offers Professional growth, while being resourceful, innovative and flexible

Experience

Senior Software Engineer (August, 2020 – Present)
Capgemini (Bangalore)
Software Engineer (September, 2018 – August, 2020)
CGI Group Inc. (Bangalore)
Associate Software Engineer (March, 2016 -September, 2018)
CGI Group Inc. (Bangalore)

Technical Skills

Technologies worked

Core-Java, J2EE, JDBC, JUnit, Mockito, REST web services, microservices, Spring Boot, Oracle Database, HTML& CSS.

Tools Used

SourceTree, Azure Devops, Gitlab, STS, Eclipse, Maven, Sonar Lint, Bitbucket, SQL Developer, Docker, IBM ClearCase, IBM ClearQuest, Jira, Versata, Jenkins, Confluence.
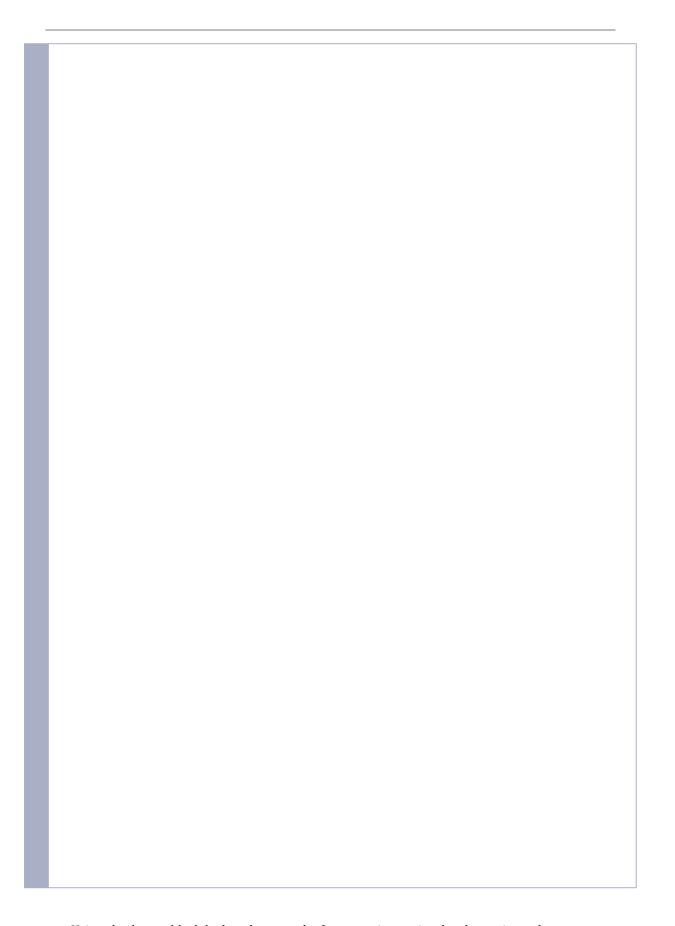

Project Details

EZrider

Iot project for dell emc product Secure remote services for managing connectivity across users – Working as a senior developer to take up development of new microservices ensuring its failure inability in predefined scenarios using Java, Spring boot, Junit and Mockito and RestAssured methods for development and testing and Oracle& SQL Server for database related functionalities and use of docker for VE related tasks, following agile methodology.

Responsibilities Undertaken:
• Development of microservices and api's for specific requirements mainly involving backend development using technologies like - Java, spring boot along with oracle databases.
• Understanding of spring security and docker containers & its deployments and utilizing this to work with various api on local level.
• Writing junit test cases for unit testing from developer's level.

- Using checkmarx,blackduck and sonarqube for managing project level security and stability by removing vulnerabilities and insecurities
- Using Azure Devops tool to handle enhancement/defect tracking

- Using Gitlab for deployments and version management tool.

Advantage Financial Management

Financial management Project on CGI Advantage Product - Worked as a senior developer to implement new client patch requirements using Java technology and Oracle& SQL Server for database related functionalities following agile methodology of work .

Responsibilities Undertaken:
- Gathering of requirement from multiple US states government client users.
- Understanding and documentation of requirements from functionality perspective.
- Support continuous improvement by investigating alternatives and better solutions ensuring no functionality break.
- Development work mainly involved backend development using technologies like - Java, HTML/CSS along with oracle databases.
- Understanding of spring security and docker containers & its deployments.
- Assisting in writing test cases for system Test.
- Using Jira to handle enhancement/defect tracking and BitBucket as versioning tool

IP Factory – Denmark

Healthcare Management Project on CGI product NES – Worked as a developer to implement client side requirements using Java & J2EE technology with springboot model and Oracle for database related functionalities following agile methodology of work.

Responsibilities Undertaken:
- Worked Full Stack Developer with backend technologies- Java and frontend- HTML,css,javascript.
- Implemented project using spring framework through spring boot microservices model structure mainly along with REST web services as part of Development process.
- Writing test cases using Junit.
- Code Deployment using Sourcetree
- Used Bitbucket tools to version controls.
- Participate in sAFe Agile ceremonies
- Using Jira to handle enhancement/defect tracking

Awards & Recognitions

Awarded with CGI Impromptu award twice.

Received Work recognition award for the continuous effort during critical client releases.

Certifications

Core Java Training Course

My SQL

Education

B. Tech (Completed in May, 2015)

Krupajal Engineering College (BPUT University), Odisha.

Intermediate (Completed in March, 2010)

D.A.V, Bokaro Steel City, Jharkhand.

Primary and Secondary Education(Completed in March 2008)
Saint Francis School, Deoghar, Jharkhand
