4. Salesforce Certified Platform Developer II
5. Salesforce Certified Sales Cloud
6. Salesforce Certified Service Cloud
7. Salesforce Certified Community Cloud
8. Salesforce Certified Data Architecture and Management Designer

PROJECTS

1. Salesforce Org Compare: Internship with Persistent Systems Ltd. (Feb 2018 – April 2018)
Team size: 10, Role: Team Member
Key Skills: *Salesforce, Javascript, HTML, CSS, JQuery, REST API*

A Salesforce application which allows users to compare metadata between two different orgs.
I handled below responsibilities:
- o Factory Pattern implementation
- o Apex Class component integration
- o REST API callouts implementations
- o Integrate Javascript library called Mergely with Visualforce

2. Davita Healthcare Partners, USA – Sales Cloud: **Full Time Project** (July 2018 – Present)
Team size: 8, Role: Senior Developer
Key Skills: *Salesforce, Aura, Apex, Trigger, LWC, HTML, CSS, Javascript, SFDX, VS code, Declarative Tools*

Project Description :
Show campaigns on a JS **Event Calendar** library integrated with Aura. Custom functionalities including **Event Survey** for events taken using **event registration** through the Event calendar. Storing the **survey responses** via various channels like email links, in-person via lightning component UI. Maintaining millions of Contacts and Leads and sending them periodic emails for marketing related activities using **Marketing Cloud**. We have **salesforce community** implemented too which hosts self help **knowledge articles** and other contact information for company's licensed physicians. We **maintain multiple orgs** and a new org is coming soon where we will **migrate metadata**.

Roles & Responsibility:

- o Worked on different **Lightning components, LWC POCs, Apex classes and triggers, Batch classes**.
- o Actively involved in various configuration related activities like workflow, process Builder, validation rules, email templates, building the sharing model for the project.
- o Responsible for various deployment activities through changesets and SFDX through visual studio code.

3. Advanced Web Forum **Side Project**
Github Repo :(https://github.com/pkslnct/PHP-Forum **)**
Live website :(https://chitchattree.000webhostapp.com/ **)**
Mentor: Self | Team Size: 1
Key Skills: *Bootstrap, AJAX, HTML, Javascript, CSS, Mysql, PHP*

Web Forum that enables its registered users, in a secure environment, to share their resources and information freely and discuss about their problems and find solutions.

4. Gitlab SFDX CICD Pipeline **Side Project**

Gitlab Repo(https://gitlab.com/pankaj_singh5/DreamHouse-sfdx)
Dockerhub (https://hub.docker.com/repository/docker/pankajsingh5/gitlab-sfdx/)
Docker image repo(https://github.com/pkslnct/sfdx-cli-gitlab)
Mentor: Self | Team Size: 1
Key Skills: *SFDX, YAML, Docker, VS code, Salesforce*

I implemented CICD pipeline using SFDX and Gitlab for Salesforce automated metadata deployment. This makes deployment and testing quick and easy to do.
