

EKATMATA PANIGRAHI

FULLSTACK DEVELOPER

97425 49619

ektapani9753@gmail.com

Mumbai

EDUCATION

B. Tech in Production Engineering,
Veer Surender Sai University of Technology, Burla, Orissa

2012-2016

Higher Secondary Certification

G. M. Junior College, Sambalpur

2010 - 2012

Marticolation (CBSE), Gurunanak Public

EXPERTISE

- React JS
- React Native
- Angular 2+
- Web Services
- jQuery
- JavaScript
- Apache Kafka
- CSS / HTML
- Java
- PLSQL
- Micro Services
- Spring
- Node JS

AWARDS

Branch Gold Medalist in College

PROFILE

A bright FullStack Developer with over 6.10 years of experience. Proficient at software designing and problem solving skills. Looking for better career prospects, professional growth and work opportunities.

EXPERIENCE

SOFTWARE ENGINEER

Xebia Architect (Client - IDFC Bank) | May 21 - Present

- Created web pages for IDFC Bank client using React and Springboot.
- Used PL SQL and Springboot for getting the data into web page.
- Used Git Hub for version controlling.
- Used Kafka and Multi threading for various projects.
- Created micro services applications using Kafka and spring boot.
- Created api for uploading and downloading file using micro services and spring boot.

SOFTWARE ENGINEER

British Telecom | 2019 - Apr 21

Part for the MYSD account of BT as a Full Stack Developer. Worked on end to end implementation and development of the project.

Front End/ UI Skills

- Created client webpage for users by employing Angular, React, jQuery, JavaScript, HTML, CSS and Bootstrap.
- Designed the user experience interface, UI/UX strategies, UI requirements and converting findings into UI design. Leveraged MVC pattern to design AngularJS controllers, directives, factory and views.
- Developed the reporting dashboard using fusion charts and React.
- Created webpages by using React JS for the customer for the BT.
- Used Google Maps API to developed integrate map related need in the project.
- Integrated tools like Skype, Yammer & Outlook for better user experience on webpages.
- Integrated the REST services to get data from client database on to the webpage using React JS.

Deployment Skills

- Used SVN and GIT to push the code to client Repos.
- Used Sonar Qube, Jasmin, Karma and JUnit for code quality check.
- Used Jenkins, Kubernetes & Docker to deploy the code.

SKILLS

Time Management
Problem Solving
Critical Thinking
Creativity
Attention to details
Leadership
Teamwork
Adaptability

INTERESTS

Travel
Dancing
Reading
Fitness
Yoga

Back End Skills

- Assisted in the requirement gathering to evolve the API
- Designed, developed, deployed and supported RESTful services in java spring boot.
- Made use of spring hibernate framework to develop the rest APIs.
- Used micro-services for the backend design with Eureka client and Zuul as the API gateway.
- Utilised JAVA & MicroServices to work on the various backend services.
- Used Node JS for developing APIs.
- Experience with various database technologies like PLSQL, Elastic Search and MongoDB.
- Worked in Kafka for real time data analysis in conjunction with spark

SOFTWARE ENGINEER

Accenture | Jun 16 - Dec 18

Had worked for the Shell (Royal Dutch Shell) account as a front-end developer. My objective was implementation of front end development, Back end development, and the deployment of the implementations by employing the Jenkins tool.

Front End/ UI Skills

- Created the client webpage used by users by employing AngularJS, jQuery, JavaScript, HTML, CSS, Bootstrap.
- Developing new features in the client website using Angular.
- Used plugins like JSPDF, RaphaelJS to create complex component like PDF generation and Sankey Diagram
- Used Google Map API and ArcGIS to develop map related requirements in the project.
- Used languages like D3, C3 to create various types of complex charts.
- Developed webpages using ReactJS platform.

Back End Skills

- Assisted in the development of technology roadmaps to evolve the API estate in conjunction with internal and external solution providers.
- Designed, developed, deployed and supported RESTful services.
- Used spring hibernate framework to develop the REST APIs.
- Used JAVA to work on the various backend services.
- Have experience of various database technologies such as MYSQL and Aginity.
