

# UJJAWAL PATHAK

## Associate Engineer

Efficient professional with 2.5+ years of experience and proven knowledge of application development, cross-functional team, and research and development. Aspired to contribute and gaining knowledge from various fields and relating them and aiming to leverage my skills to successfully fill the Application Developer role at your company.

## Work History

2019-09 -  
Current

### Associate Engineer

*Atos Global IT Solutions, PUNE, MAHARASHTRA*

- Experience on AWS EKS service starting with creating the cluster using CloudFormation, deploying services in the cluster, collecting logs from the cluster using ELK stack and monitoring the cluster using Prometheus and displaying it on Grafana dashboard.
- Worked on getting real-time data from sensors and storing it in the Cassandra database using Apache Kafka and Nifi.
- Used Docker for creating containers for Java and Angular applications with custom specifications.
- Worked on platform automation using CI/CD pipelines and Ansible for saving time and manual work.

2018-08 -  
2019-08

### Application Developer

*Atos Global IT Solutions, Pune*

- Written AWS Lambda functions for auto-scheduling of AWS Services.
- Implemented AWS SES using Workmail and Route53 to send notification mails from new domains.
- Automated complete infrastructure using Ansible and Jenkins, also AWS services with CloudFormation.
- Successfully implemented Custom DNS server across different Virtual Private Clouds for data sharing
