## EDUCATION

---

Bachelor in computer science

JNTUH College

📅 Expected Graduation: 2020

## EXPERIENCE

---

Web Developer Intern - FT Company

📅 Jan 2020 – March 2020

- Worked as an Web Developer intern in FT Company to develop a responsive dynamic website for the company.
- My role was to develop a website for the company and add the selected features to it.
- I used to motivate the team with my attitude and make the environment creative and enthusiastic.

## PROJECTS

---

Weather App

📅 August 2020

- Developed a responsive dynamic **Weather app**, where the user can find the weather report of any place by entering the place name.
- To create this project I have used OpenWeatherMap API to fetch the data of user input.

---

Quote Generator

📅 June 2020

- Built a **Quote generator** which generates random quotes with the help of quotable API.
- Added a option where user can generate quote's according to their interest

---

Joke Teller

📅 November 2019

- Build a project where anyone can come and listen to the joke's just by clicking the a button "Tell Me A Joke".
- This project is not just displaying the random jokes on screen, instead it tells a joke **verbally** .
