- Interacted with Business users, Business Analysts to understand reporting requirements and transform them into technical specifications.
- Involved in the development of new Tableau Dashboards and publishing them to Tableau Server.
- Developed Tableau workbooks using Data Blending feature which involves the integration of multiple data sources like relational database and flat files.
- Using Alteryx (version 11.5) as ETL tool to create modules that generated data sources required for the tableau dashboards.
- Involved in the different Dashboard actions like URL Filters, Action Filter and User Filters.
- Performed different calculations like Quick table calculations, Date Calculations, Aggregate Calculations, String and Number Calculations.

Environment: Tableau Desktop 2020.3, Tableau Server 19.2, SQL Server Management Studio, Excel, Jira, Oracle 11g, Alteryx, Python, Workday, AWS Data Lakes, Redshift, AWS Glue, AWS DMS, AWS D ata Lake Formation

NationWide Appraisal Network, CA October 2018-2020
Tableau Consultant

- Participated in gathering BI requirements for various teams.
- Served as a liaison between the business and the IT department by conducting weekly calls/meetings with stakeholders, developers, QA Team, UAT Team to document any changes and apply them to Tableau reports as needed.
- Combined views and reports into interactive dashboards in Tableau Desktop that were presented to
- Created action filters, parameters, and calculated sets for preparing dashboards and worksheets in Tableau.
- Built Complex Reports using advanced reporting functions like with YTD calculations, MTD calculations, percentage differences, sets and groups etc. in Tableau.
- Effectively used data blending feature in Tableau.
- Used advance chart visualizations in Tableau like Dual Axis, Box Plots, Bullet Graphs, Tree maps, Bubble Charts, Water Fall charts, etc., to solve complex problems.
- Using Alteryx (version 11.5) as ETL tool to create modules that generated data sources required for the tableau dashboards.
- Created visual workflows in Alteryx for data blending and analysis using data quality, integration and transformation.
- Used Alteryx to blend data from multisource and generate TDE for FE Tableau.
- Worked on integration of Tableau with R and assist output R images into dashboards as objects.
- Worked in writing complex SQL queries that involved multiple joins and user defined functions.
- Scheduled the tasks and time to time refresh data when the sources are published or extracted to server.
- Performed calculations to update weekly price of company products using Microsoft Excel

USAA, Remote, 2016-2018

Tableau Consultant

- Operated in Excel with advanced functions such as v-lookups, pivot tables, VBA, macros and advanced formulas
- Transformed raw data into Visual Analytics with projection of significant KPIs.
- Created Dashboards to allow the users to dynamically interact with the data to the lowest level of granularity.
- Run daily scrum meetings and facilitated working sessions to ensure team is focused and accomplishing the tasks at hand
- Used Business Objects to create reports for marketing and finance departments
- Created moderate to advanced reports with drill-down, cross tabs, prompts, charts, alerter, rankings and various calculations
- Created classes, dimensions, measures, and detail objects in the universe

Environment: Tableau Desktop 10.5, Tableau Server 10.5, 9.0, Parameters, Action Filters, Complex Reports, Flat files, CSV Files, YTD & MTD Calculations, SQL Server Management Studio, Excel, SQL, Windows 8.1,10. , Alteryx 11.5
