

TEJASWINI D

SOFTWARE ENGINEER

EXPERIENCE

Software Engineer

IndianMoney.com

09/2020 - Present

Joining as a Software Engineer I am responsible for developing flutter apps with new features and building new functionalities on schedule of the app.

- Refactoring the code in Bloc architecture to enhance the performance, maintain good quality of the code and making it reusable.
- Synchronize data with Rest API and access real time data.
- Integrated Hive model as local DB to store data.
- Work collaboratively in teams and develop good relationships to achieve common goals.
- Contribute to the functional definition of customer requirements of the mobile application.

Flutter Developer Intern

Gogame

06/2020 - 09/2020

Joining a small game development team, I was asked to support senior developers in the development of cross platform applications and gain proficiency in Flutter.

- Develop applications based on Flutter using MVVM architecture.
- Integrate external services like payment, maps and cloud functions in the application.
- Support senior developers to define structure and components for projects and make it reusable.
- Keeping the code quality high and reviewing code with other developers and suggesting improvements.
- Interact with designers to suggest changes to make sure the view they have about the design is translated into functionality.

Full Stack Developer Intern

HISY Advertising Solutions

12/2019 - 05/2020

As the first developer of the company, my goal was to work with the CEO to develop the content for the website and build a static website with contact form and integrated appointment scheduler.

- Developed all static pages on the fly.
- Integrated contact form with firebase.
- Built automatic calendar scheduler using Google API's.
- Developed an auto mailer for every contact form entry which was delivered to the sales team chronologically.
