 - Took responsibility of delivery and management of the tasks
 - Worked with the Scrum Team and the Product Owner to negotiate the minimum viable product for delivery
-

PROJECT TITLE

NSF TRAQTION

PROJECT DURATION

FEB 2016 TO OCT 2017

ROLE

SCRUM MASTER / APM

PROJECT DESCRIPTION :

TraQtion is a cloud-based quality and compliance software that helps retailers, restaurants and manufacturers to proactively manage their supply chain, sites and product quality all in one place. Formerly known as Aspirago, TraQtion was developed by NSF International to help the customers maintain a higher level of food safety and quality compliance and is now available to all companies looking to make smart decisions based on timely, insightful information.

With TraQtion modular offering, you have a custom solution to fit your processes and business goals by choosing only the modules you need now, but with peace of mind that you can activate any other module when you are ready. TraQtion also integrates with NSF's food safety services, forming a powerful global managed solution to help protect your brand.

ROLES & RESPONSIBILITIES :

- Defining project roadmaps and delivery plans
- Communicating project status to the team and wide range of stakeholders
- Managing client's expectations on project development
- Mentoring junior team members to help them realise their full potential
- Working closely with product owner on grooming the product backlog
- Facilitating, Planning, Stand up, Grooming, Demo and Retrospective meetings
- Works with project managers and stakeholders to ensure on-time delivery and manage schedule
- Developed close relationship with team, development manager, product owner and other team
