Profile

As an accomplished Engineering Manager with a proven track record of leading high-performing teams, I bring extensive experience in driving product development and ensuring engineering excellence. I excel in creating collaborative environments that foster innovation and efficient project delivery. My expertise includes strategic planning, cross-functional leadership, and a deep understanding of the software development life cycle. With a passion for technology and a commitment to delivering impactful solutions, I am dedicated to driving teams to success in dynamic and challenging environments.

Text

Thanks for watching my Profile. If you are Techy I would like to invite you at coffee shop though we can/can't work together.

Skills

python django flask aws php laravel reactjs vuejs nuxtjs mysql

postgress aws gcp architecture dfs system design html css javascript

kafka docker kubernetes linux gcp GraphQL fastapi goLang Gin node.js

express mongodb

Education

04/2009 – 04/2013

computer science | b.tech
charusat

Work Experience

07/2023 – present
banglore, India

senior product developer
Unilog(via infopine)
Accelerated Product Development
- Spearheaded the implementation of agile methodologies, streamlining product development processes and achieving a remarkable 20% reduction in time-to-market.
- Engineered a 90% boost in development speed and a 30% surge in overall efficiency.
- Fostered a collaborative and empowering work environment, mentoring 6 team members and nurturing their professional growth.
Technical Expertise

Work Experience

- Proficient in Vue.js, React.js, Python, flask, node.js, express, Golang, Gin and OpenAI,AWS wielding these tools to craft innovative solutions.
- docker, kubernetes, kafka, redis , git
- Possess a deep understanding of cutting-edge technologies, continuously expanding knowledge base to stay ahead of the curve.

05/2022 – 06/2023
noida, india

Senior software engineer
impressico bussiness solutions

- Technical leader and mentor with expertise in data processing and problem-solving.
- Successfully led and mentored teams in the execution of complex Hitachi projects.
- Proficient in Vue.js, React.js, Python, flask, node.js, express, Golang, Gin and OpenAI,AWS wielding these tools to craft innovative solutions.
- docker, kubernetes, kafka, redis , git
- Conducted extensive research and analysis on data processing functions, methods, and procedures.
- Optimized data processing pipelines to enhance efficiency and accuracy.
- Pioneered the adoption of innovative data processing techniques.
- Committed to continuous learning and innovation.

11/2021 – 04/2022
banglore, india

lead developer
innowave

- Led a team of developers to achieve significant productivity and quality improvements.
- Mentored and coached junior developers to enhance their skills and team performance.
- Proficient in Vue.js, React.js, Python, flask, node.js, express, Golang, Gin and OpenAI,AWS wielding these tools to craft innovative solutions.
- docker, kubernetes, kafka, redis , git
- Advocate for collaboration and innovation to drive the development of groundbreaking software solutions.

11/2018 – 11/2021
rajkot, india

lead devleoper/product manager
7technosoft

- Led a team of 10 developers to successfully launch a cutting-edge software product.
- Implemented agile methodologies to significantly increase efficiency and productivity.
- Streamlined product development processes to reduce time-to-market by 20% and improve customer satisfaction.
- Collaborated with stakeholders to increase customer acquisition and retention rates by 30%.
- Proficient in Vue.js, React.js, Python, flask, node.js, express, Golang, Gin and OpenAI, wielding these tools to craft innovative solutions.
- docker, kubernetes, kafka, redis , git
- Demonstrate strategic collaboration and agile leadership skills.

10/2016 – 11/2021
rajkot, india

software engineer php
RNSB limited

- Developed and implemented scalable web applications using PHP, resulting in a 50% increase in website performance and a 20% decrease in page load time.
- Collaborated with cross-functional teams to design and build RESTful APIs, integrating third-party services and ensuring secure data transmission.
- Proficient in Vue.js, React.js, Python, flask, node.js, express, Golang, Gin and OpenAI, wielding these tools to craft innovative solutions.
- docker, kubernetes, kafka, redis , git
- Conducted thorough code reviews to identify and fix bugs, resulting in a 30% reduction in application crashes and improved overall system stability.
- Led the migration of legacy systems to modern frameworks and technologies, reducing maintenance efforts by 40% and enhancing code maintainability.

🏷 Projects

1. **Keystone:** Developed an ecommerce platform akin to Salesforce/Zoho CRM.
Utilized React.js, Vue.js, Python, Docker, and AWS. Successfully delivered a comprehensive solution for ecommerce needs, incorporating robust technology
stacks.

2. **Mhymtach:** Spearheaded a chatbot
automation project using Gin, GoLang, Twilio, and OpenAI. Enhanced
conversational capabilities through natural language processing algorithms. Deployed and maintained the chatbot system, resulting in improved customer satisfaction and operational efficiency.

3. **Hitachi E-commerce Website:** Led the development of
Hitachi's vendor management system using React.js, Laravel, PHP, and Agile methodologies. Contributed to efficient vendor management within an ecommerce
framework.

4. **VIGIE [IoT]:** Engineered an IoT
technology: react.js, node.js, express,mongodb
product for cooling management using sensors. Implemented cutting-edge technology to optimize cooling processes.

5. **Real Estate Listings:** Developed a responsive
web application using React.js and fast API. Implemented user authentication, Google Maps API integration, and fastAPI. Enabled users to search, browse, and save favorite real estate listings.

6. **Task Management Dashboard:** Created a task
management system with React.js and Django. Implemented drag-and-drop functionality, Redux for state management, and Django REST framework for seamless frontend-backend communication.

7. **Recipe Sharing Platform:** Designed a recipe
sharing web application with React.js and node.js. Integrated user
authentication, cloud storage for recipe images, and utilized .

8. **Online Marketplace:** Engineered an online
marketplace platform with React.js and Django. Implemented user authentication,secure payments via Stripe API, and Golang / Gin

9. **Project Management Tool:** Developed a project
management application with React.js and flask.

🏷 Certificates

SAFe 6.0 agilist [project management]
Udemy
https://www.udemy.com/certificate/UC-e7d76723-05ad-428b-bdea-f06375c8e82c/

This certification in SAFe® (Scaled Agile Framework) 6 Agilist is designed for professionals looking to master the application of Lean-Agile principles and practices at scale within their organizations. The course offers comprehensive training on the SAFe® framework, emphasizing collaboration, delivery, and improvement across Agile teams. Participants will learn to effectively synchronize teams, manage complex projects, and promote alignment with business goals through Agile Release Trains (ARTs). The program prepares individuals to lead transformational efforts, optimize workflows, and ensure a seamless transition to Agile methodologies, making it ideal for leaders seeking to drive efficiency and agility in large-scale projects.

Certificates

Engineering manager
Udemy
https://www.udemy.com/certificate/UC-90e7fbe0-509a-4871-b93b-2f5b079eeb9f/

This certificate in Engineering Management equips professionals with the essential skills required to lead engineering teams and manage complex technical projects effectively. Covering a broad spectrum of topics, the course delves into leadership principles, project management methodologies, strategic planning, and operational excellence within the engineering domain. Participants gain insights into fostering team collaboration, enhancing communication, and driving innovation while ensuring projects meet quality, budget, and timeline objectives. This program is designed for aspiring or current engineering leaders aiming to enhance their managerial competencies, navigate the challenges of technology-driven environments, and lead their organizations to success.
