Sophos – Sophos Wireless Assurance Tool

Industry : CyberSecurity
Technology : Java, Spring boot, MongoDB, Angular
Role : Full Stack Developer

About project:

Sophos wireless assurance tool that runs on an enterprise endpoint, monitors the SOPHOS WIFI connectivity experience. The data to measure experience and troubleshoot the system is read from the WIFI driver inbuilt in the system. The first step is that the application needs to be able to scan for access points within the range of the device and capture the results of that scan. Next step is that the
