PROJECT SUMMARY

- July 2021 - Present
Role : Software Developer
Project Name : Field Delivery Platform
Technologies : Angular 11, HTML5, SCSS, TypeScript, MongoDB, C#, ASP.NET
Responsibilities : Understand Requirement / Analysis / Debugging / End to End Development / Testing

The Field Delivery Platform serves as a comprehensive business solution, seamlessly managing the entire lifecycle of product and service delivery across various sectors. This innovative system ensures efficient allocation of resources such as personnel, equipment, and materials to specific locations at the optimal time. Through real-time updates, it enables swift adaptations to changing conditions, enhancing the agility of operational management.
- April 2020 - June 2021
Role : Software Developer
Project Name : Corporate Clock
Technologies : Angular, MongoDB, NodeJS, ExpressJS, TypeScript, JavaScript, HTML 5, CSS 3, Bootstrap, Angular Material
Responsibilities : Understand Requirement / Analysis / Debugging / End to End Development / Test

Corporate Clock is all-in-one solution and it offers seamless attendance and leave management, customizable leave policies, precision shift timing control, and easy requests for comp-offs and overtime. Empower team with personalized profiles, an intuitive employee dashboard, and robust admin controls.
- Nov 2019 - Mar 2020
Role : Software Developer Trainee
Project Name : Infy Mansion
Technologies : Angular, MongoDB, Node JS, Express JS, TypeScript, JavaScript, HTML, CSS, Bootstrap
Responsibilities : Understand Requirement / Analysis / Debugging / End to End Development

The Project involves development of a web application to enable the users to buy and sell homes
