Working as a full time Salesforce Product Developer. Involved in development of different enterprise level applications, that are also listed on AppExchange.

Softgains Tech Solutions Pvt. Ltd. / Salesforce Developer
JANUARY 2018 - AUGUST 2018, NOIDA

Projects

SwissRe IPTIQ Financial Service Cloud Implementation
(Current)

IPTIQ is an Insurance company, and has their own system to manage/track & process the insurance application.

We have done integration with the Five9 and created a component which is a guided path for the Salesforce Agent to fill out the form and then I have integrated the Salesforce and Azure Logic Apps to get the Quote Offers and process the application form.

IHS Markit Salesforce Integration

IHS Markit's Outreach360 is a KYC management system where businesses request KYC from their Customers. The purpose of integration was to provide the Salesforce users the ability to access the Outreach360 from the Salesforce and can perform the day to day tasks.

Implemented an Integration between IHS Markit's Outreach360 and Salesforce. Designed custom dashboards and displayed the marketing email directly in a custom lightning component using web services.

Aavya FSL Implementation

Role was to debug apex code issues, code quality checks, implementation automations of product & shipments.

Salesforce to Mailchimp Integration

Developed Integration application with Mailchimp from scratch. This application provides users the ability to perform action on the Campaign & Subscribers of Mailchimp from Salesforce.

Users can create Salesforce Contact or Lead as a Subscriber or can import Mailchimp Subscriber to Salesforce as Lead or Contact, also users can import the reports of the Campaigns.

Salesforce to Quickbooks Online Integration

Created an application from scratch in Salesforce Lightning which imports the Quickbooks Online Accounting data to Salesforce. Data that we have imported in Salesforce are Products, Customers, Invoices, Estimates & Payments.

Used oAuth 2.0 Authentication for connecting Salesforce to Quickbooks Online.

Cab Management System in Salesforce

This application is developed using Lightning Web Component (LWC) Framework. This is native application built in Salesforce for managing & booking cab systems.

Super Image Slider

This is a free carousel component listed on the AppExchange, which is used to create a slideshow of images by picking them from the 'Notes and Attachment' section of the record page.

One can also create a slideshow of images by inserting the URL of external images directly.

It also provides a way to insert any youtube videos in the slider panel on the homepage.

Salesforce to Shopify Integration

Worked on the application in Salesforce Lightning which imports the Shopify data to Salesforce. On this project I have implemented the functionality from scratch & provided support to the customer, with their customization needed as this app is publicly available on the AppExchange, customization includes writing triggers, process builders or modify the app to meet client's business requirements.
