Salesforce Certified
Platform Developer I

March 2020

EXPERIENCE

Cognizant

Dec 2021 - Present

Priority Power Management | Associate 1

Dec 2021 - Present

Texas, United States

This project enabled PPM with the process of reconciliation of every payment they get from the brokers. Their competitors does not have the reconciliation yet.

- Created a portal to upload CSVs provided by the brokers. Parses the data and then re-conciliate with the existing data.
- Developed Complex React components to showcase data.
- Built Rest APIs and Deployed on Heroku.
- Provided the ability to map the columns from the CSVs.
- Did Integration with AWS S3 bucket using REST Callouts.

Cyber Group

Mar 2018 - Nov 2021

Brink's Home Security | Consultant 2

Dec 2018 - Nov 2021

Texas, United States

Brinks Home Security is a brand of home security systems which sells security alarm and home automation equipment. The project was to develop new features and maintain the E-commerce site of brinks home security.

- Developed features for the ecommerce website, managed promo-codes and added subscription functionality.
- Wrote React components to enhance UI.
- Responsible for various backend tasks such as creating RestAPIs.
- Built applications which encapsulate microservice architecture.
- Host application on Google cloud app engine platform and Heroku.

Alliantgroup | Consultant 1

May 2018 - Nov 2018

Texas, United States

Created a Scoring Application for their clients in UK and USA. This helped their sales representatives target more important opportunities.

- Created Scoring Maintenance Application for Opportunity and Leads using LWC, javascript and apex.
- Built the UI for specific profiles to define custom scoring rules.
- Wrote Apex classes, Apex triggers, Batchable, and schedulable Apex classes based on the requirements.
- Built multiples flows to achieve some required automation.
