Project Experience:

PROJECT #1:

- Project Name : British Petroleum-LSE, London
- Role : Boomi Integration Developer and Support Engineer
- Duration : January 2020 to May 2021

Project Description:

BP (P.L.C)-LSE (formerly The British Petroleum Public Limited Company-Listed Stock Exchange) is a British multinational oil and gas company headquartered in London, England. It is one of the oil and gas supermajors and one of the world's largest companies measured by revenues and profits. It is a vertically integrated company operating in all areas of the oil and gas industry, including exploration and extraction, refining, distribution and marketing, power generation, and trading.

Roles/ Responsibilities:

- Develop and Implement Boomi Integration Solutions for various business applications, ensuring seamless connectivity and data exchange between systems.
- Collaborate with cross-functional teams to gather requirements, analyze business processes and design integration architectures that meet organizational need.
- Responsible for the full development lifecycle, including requirements gathering, design, development, testing, deployment and post implementation support.
- Conduct thorough testing to identify and resolve integration issues, ensuring data accuracy and system reliability.
- Optimize and troubleshoot existing integration processes to improve performance and efficiency.

PROJECT #2:

- Project Name : ANL Transportation, Melbourne
- Role : Boomi Integration Developer and Support Engineer
- Duration : June 2021 To October 2022

Project Description:

Personifying our Australian foundations by way of multiculturalism, approachability and go-getting attitude, we at ANL pride ourselves on being "The Spirit of Endeavour." Offering shipping solutions throughout Oceania in addition to value-added-services and specialized programs around break-bulk and out-of-gauge, ANL is committed to providing total end-to-end support for our customers.

Roles/ Responsibilities:

- Attending client meetings to understand the business requirement.
- Design the Architecture of the Integrations.
- Preparing the mapping sheets by collaborating with different teams.
- Involved in requirement gathering for Profiles, Maps and Process level designing.
- Worked on NetSuite, Http Client Connector and FTP connectors.
- Integrated NetSuite with Magento.
- Involved in Development for Various XML, JSON, and Flat File Profiles.
- Developing Various Maps based on their requirements using Java Script.
- Executed the test cases as per schedule, reported bugs updating the status. Deployment and Scheduling the Batch Process as per client Requirement.

PROJECT #3:

- Project Name : Leica Biosystems, England
- Role : Senior Boomi Developer
- Duration : December 2022 To till Date.

Project Description:

Leica Biosystems is a cancer diagnostics company and a global leader in workflow solutions, offering the most comprehensive portfolio from biopsy to diagnosis. Our mission of "Advancing Cancer Diagnostics, Improving Lives" is at the heart of our corporate culture. Our easy-to-use and consistently reliable offerings help improve workflow efficiency and diagnostic confidence.

Roles/ Responsibilities:

- Co-ordination with the onsite team to gather the accurate requirements.
- Responsible for development of entire use case (end to end).
- Involved in developing Java Script, Processes, Maps and Connectors etc.
- Done the Unit and system testing for Processes, Maps and Connectors.
- Analyze the process logs and reduce the time taken for the processes.
- Preparing Technical design document.
- Responsible for debugging, analysis and resolution of issues.
- Responsible for interface unit testing, deployment and user acceptance testing.
