

Name: Toorpati Vijay

Mail id: Vijaytoorpati78@gmail.com

Mobile No: +91- 8106365054

Objective:

Seeking a challenging position in the development of Applications where there is an opportunity to share, contribute and upgrade my knowledge for development of self and organization served.

Experience Summary:

Worked for **Cognizant Technology Solutions** and **Accenture** as an RPA Developer.

Professional Summary:

- I have total 3.6 years of experience in that 2.2 years of relevant experience on development in Robotics Process Automation (RPA).
- **Handson Experience in**
 - UiPath
 - All phases of Robot Development Life Cycle (RDLC). Process Identification and Automation feasibility analysis
 - Process Design Documentation (PDD) & Solution Design Document (SDD) Development
 - Development using UiPath.
- Good hands-on experience on Robotics Process Automation (UiPath) Tools and having feasibility analysis and understanding of business flow.
- Experience in requirement gathering, Automation Feasibility Analysis, coding, testing, debugging, documentation, and implementation.
- Worked in UiPath Studio and Orchestrator extensively during projects.
- Did almost all kind of automation for example: Excel Automation, Web Automation, E-mail Automation, PDF Automation, Image/OCR Automation etc.
- Used different UiPath automation techniques to automate complex processes. E.g., Scrapping, OCR extractions, Recordings, Ui Explorer, Selectors, queues, publishing, and provisioning etc.
- Strong Knowledge on ReFramework, Document Understanding, Action Center
- Have in-depth knowledge and worked with 100 plus activities offered by UiPath
- Good at understanding the process and designing bots which best suites the process to be automated.
- Having knowledge on **Automation Anywhere**.

Academic Qualification:

- B.com Computers applications from Telangana University in 2018
- Intermediate in commerce from Vignan Jr college in 2014
- SSC from ZPHS boys govt school in 2012

Technical Skills:

- RPA (UiPath & Automation Anywhere)
- Knowledge on VB.Net
- SQL
- Linq queries
- Regular expressions

Project Experience:

Project : Dunning Blocker

In this process user manually place the emails in outlook folder. Bot will pick up the emails then extract required data from emails and update into excel file. The bot will open transactions in Oracle application then based on business requirement and conditions process the transactions and update the output in excel file.

Project : Downloading Invoices and Comment Updater

In this process user to manually place the input file's (Aging Reports, NSO mapping File, Input file with Account Number/Invoice Number) in the Automation Folder. Bot will validate the account/invoice number with NSO mapping file and Select the Entity in Oracle application to download the invoices and update the comments. Enter the Invoice Number to download the Invoices from Oracle. Enter the Operating Unit, Account Number to update the comments in Oracle.

Project : Vehicle Insurance

In this process the bot gets the policy number from an application and download the pdf attachments from the policy and as per the request it will extract the policy information from the attachments then bot will update the extracted information into an internal application then bot will write a note as per the request task has completed.

Project : Insurance claims

In this process the bot fetches the claims from emails and saves the attachment to specify folder and the bot then searches for the policy holders account in our internal application and validates the information. Based on validation the bot proceeds with copying the claim information to the claims application and attaches the pdf and sends an email to the claims processing department for further processing

Role & Responsibilities in project handle

- Designing, developing and testing automation workflows.
- Should be able to create a complete technical architecture for RPA projects making sure the architecture is extensible and scalable.
- Understand workflow-based logic and, establish and understanding of current state of the business process and conceptualize the future state of the same in an automated solution.
- Go to the requirement gatherings.
- Responsible for provisioning of those bots in UiPath orchestrator, organization wide and schedule them.
- Created flowchart and sequences according to UiPath best practices to create bots.
- Used number of activities in different workflows to suffice automation requirements
- Identifying exceptions and its solution by testing each activity. Used debugging features present in UiPath Studio

Hobbies

- Good at dance
- Like to Play cricket
- Watch YouTube

Personal details

Name :Toorpati Vijay
F. Name :Toorpati Anjaiah
Date of birth :12/06/1997
Languages Known :English, Hindi & Telugu
Contact Address :11-36/5, Rajaram Dubba,
Village. Tadkole.
Mandal. Banswada, 503187.

Declaration:

I hereby declare that the above information is true and accurate to the best of my knowledge.
