PAVAN TEJA KOTTI

RPA LEAD DEVELOPER

Phone: 8008288160

E-mail: pavanteja.kotti@gmail.com

PROFILE

Dynamic and dedicated overall 7.1 years of rich experience in IT industry and 5+ years of experience as Process Developer in Robotic Process Automation Development with tools **UIpath** & **Softmotive Winautomation.**

EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER

J P Morgan chase (2018 - present)
- Design & Development of bots in Finance LOB
- Analyzing the process and design the Robotic Automation Solution as per the Standard team designs principles.
- Developed bots in **Agile SDLC and using RPA best practices**. Ensured the release of premium-quality applications that provided intuitive experience for users.
- Worked on all kind of automation like **Excel Automation, Web Automation, E-mail Automation, PDF Automation and Image/OCR Automation**
- Developed more than **20** bots

SOFTWARE ENGINEER

Infosys limted (2014 - 2018)
- Design & Development of bots in CISRUN
- Designed & Developed dozens of bots driving continuous improvement to processes, work flow and reporting in organizations.

SKILLS

- Automation Tools : **UIpath, Softmotive Winautomation.**
- Programming   : **VBA, Vbscript, C#.net**
- Database   : **Sql**
- ETL Tools   : **Informatica Power Center9.5**
- Certification   : **Certified in UIPATH**

EDUCATION

B.TECH (COMPUTER SCIENCE & ENGINEERING)   **GVV Institute of Technology JNTU-K (2009 - 2013)**

PROJECTS UNDERTAKEN

- **Project : LOB cuts and Drilldowns**
- **Description** : Bot will fetch the data from essbase application cubes and prepares a report for Balance sheet and pnl.
- Bot will refresh the EPM application data for all the accounts requested by the user using Bot control file.

- **Project : FR2314**
- **Description** : Bot performs reconciliation process for the BS and IS.
- Bot applies the rules given by the business in reconciliation sheets and validates if assets equal to liabilities or not.
- Bot fetches MDRNS from mappings and performs the Loan split, past due, trading revenue etc.

- **Project : lease Document Administration**
- **Description** : lease document upload process handled by lease administration team in JP morgan chase. Here JP morgan acts as either tenant or landlord for chase leased space.
- Bot connects to OVLA application via rest API
- Bot is helping to upload the documents faster into OVLA, via Document upload Automation

- **Project : Allocations HR HeadCount**
- **Description** : Bot will allocate the funds based on Legal entity rules
- Business can run the bot for different legal entities everyday using a bot mapping file.
- Bot retrieves data from smart view and performs the rules creation.
- Once the rules are prepared, Bot will upload the data into SAP system.

- **Project : CCAR External reporting**
- **Description :** Bot will fetch the data from mainframe systems for the accounts given by Business
- Bot will segregate the data fetched from the mainframe based on the account type.

RESPONSIBIILITIES

- Analyzing the process and design the Robotic Automation Solution as per the Standard team designs principles.
- Involved in understanding end to end process, Splitting the process into multiple objects, splitting the objects into multiple meaningful actions
- Have in-depth knowledge and worked with all activities offered by UiPath & WinAutomation.
- Designed dozens of bots driving continuous improvement to processes, work flow and reporting in organizations.
- Worked in WinAutomation Console and UiPath Studio extensively during projects.
- Developed bots in Agile SDLC and using RPA best practices. Ensured the release of premium-quality applications that provided intuitive experience for users.
- Used WinAutomation & UiPath to best of my knowledge to automate large number of manual repeated processes.
- Good experience in working with Excel and Web Application Automations.
- Strong knowledge in different debugging modes and different identifications.
- Involved in Release Management.
- Participated online meetings to demonstrate the capabilities of RPA for on-going projects.
- Experienced in building UiPath Processes and Business Objects for various business systems.
- Experience in using EPV vaults for maintaining, securing and retrieving the user credentials.

DECLARATION

- I hereby declare that the information furnished above is true to the best of my knowledge.
                                                                                    -Pavan Teja
